Fund Manager Commentary

March saw global equity markets continue to reflect optimism around the economy recovery, while balancing rising inflation expectations. Overall, the Fund gained 2.9% during the month, in line with peer group average, although trailed the broader benchmark gain of 4.7%. Market rotation continued to reflect fixed income markets, with the US 10-yr rising from c.1.4% to finish the quarter close to 1.75%, which supported sentiment for the Financials sector, while Tech broadly lagged in a firm US market. Positive performance drivers were more economically-sensitive holdings within the Cleaner, Safer, Circular pillar led by insulation specialist Rockwool International, a key energy efficiency enabler, gaining 16.9%, while our long-term holding in world-leading bio-refiner Borregaard gained 15.9%. Both companies benefit from higher commodity prices given shorter payback periods on insulation, and pricing outlook for Borregaard's green hydrocarbon alternatives. Encouragingly for our sustainable focus, President Biden announced the American Jobs Plan, a \$2.3 trillion climate-focussed infrastructure bill spread over the next eight years. The Plan reflects the President's goals for zero-carbon electricity by 2035 and net zero emissions by 2050, with goals of deploying 30GW of offshore wind by 2030, building two million affordable and sustainable homes and spending \$111 billion on modernising water infrastructure.
