EDENTREE GREEN FUTURE FUND

SHARE CLASS B GB00BP5FBP60

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

This fund is a sub-fund of EdenTree Investment Funds – Series 1, an open ended investment company managed by EdenTree Investment Management Limited as the Authorised Corporate Director.

OBJECTIVES AND INVESTMENT POLICY

To provide long term capital growth over 5 years or more with an income by investing globally in companies which, at the core of their business, provide sustainable solutions to some of the world's environmental challenges.

The EdenTree Green Future Fund will seek to achieve the investment objective by investing at least 80% of the Fund globally in shares of companies whose core products and services address global sustainability challenges, with a particular focus on the environment. Up to 20% of the Fund may be invested in other assets, including shares of other companies, open-ended funds (including funds managed by EdenTree and its associates), money-market instruments, derivatives and forward transactions, deposits, nil and partly-paid securities, bonds, convertible bonds, cash and near cash as deemed economically appropriate to meet the Fund's objective.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, weapon production, gambling, publication of violent or explicit materials, oppressive regimes, companies using animals to test cosmetic or household products, intensive farming, fossil fuel exploration and production and high interest lending.

The Fund will focus on companies whose products and services offer solutions for the following themes: Alternative Energy, Energy Efficiency, A Circular Economy, Environmental Services, Water Management, Future Mobility, Regenerative Agriculture. We assess a diverse set of indicators of a company's approach to sustainability during our screening process.

We do not currently intend to use derivatives for any purpose other than the efficient management of the Fund. Derivatives are financial instruments that can provide ways of benefiting from movements (up or down) in the price of underlying assets, such as stocks or bonds, without taking ownership of the assets themselves.

You may buy and sell shares on any day on which the London Stock Exchange is open for business.

Any income on the Fund will be paid out to you or you may choose to have it reinvested by purchasing additional shares.

The Fund may not be appropriate if you plan to withdraw your money within 5 years.

More information on the investment policy can be found in the full Prospectus which is available at www.edentreeim.com/literature

RISK AND REWARD PROFILE

Lower risk = Typically lower rewards

Higher risk = Typically higher rewards

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price.

- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category whereas a Share Class whose price has experienced less significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using simulated historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 6 as its price has experienced very significant rises and falls historically based on simulated data. The Fund was launched in January 2022 and therefore the risk category is based on simulated data to December 2021 with actual fund data thereafter.

What risks are associated with this fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- Selecting stocks due to our ethical criteria means that the choice of stocks is limited to a subset of the stockmarket and this could lead to greater volatility.

More details on all of the risks mentioned above can be found in the full Prospectus.
