

KEY INVESTOR INFORMATION**AMITY BALANCED FUND FOR CHARITIES**

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

This is a sub-fund of EdenTree Investment Funds for Charities, an open ended investment company managed by EdenTree Investment Management as the Authorised Corporate Director.

OBJECTIVES AND INVESTMENT POLICY

The Fund is a tax-elected Fund and aims to achieve a balance between capital growth and income.

The Fund seeks to primarily invest in a diversified portfolio of UK and international shares and bonds issued by governments and companies which make a positive contribution to society and the environment through sustainable and socially responsible practices.

The Fund seeks to avoid investment in certain areas such as companies which have material involvement (10% or more) in alcohol and tobacco production, weapon production, gambling, publication of violent or explicit materials, oppressive regimes, companies using animals to test cosmetic or household products, intensive farming, fossil fuel exploration and production and high interest lending.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environmental Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

Further details of EdenTree's Responsible and Sustainable Investment Policy are available on request or can be downloaded from our website at www.edentreeim.com.

We do not currently intend to use derivatives for any purpose other than the efficient management of the Fund. Derivatives are financial instruments that can provide ways of benefiting from movements (up or down) in the price of underlying assets, such as stocks or bonds, without taking ownership of the assets themselves.

You may buy and sell shares on any day on which the London Stock Exchange is open for business.

Any income on the Fund will be paid out to you or you may choose to have it reinvested by purchasing additional shares.

The Fund may not be appropriate if you plan to withdraw your money within 5 years.

More information on the investment policy can be found in the full Prospectus which is available at www.edentreeim.com/literature

**RISK AND REWARD PROFILE**

- The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.
- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category, whereas a Share Class whose price has experienced less-significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 5 as its price has experienced significant rises and falls historically.

What risks are associated with this fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- The entire market of UK stocks and shares might decline. Most of the assets will be invested in the UK stockmarket so could be affected by any change in this market.
- When investing in assets which are in currencies other than Sterling, exchange rate fluctuations can have a positive or negative impact on the value of your investment.
- Changes in interest rates will affect the value and the interest earned from the bonds held by the Fund. When interest rates rise, the capital value of the Fund is likely to fall and vice versa.
- Selecting stocks due to our ethical criteria means that the choice of stocks is limited to a subset of the stockmarket and this could lead to greater volatility.

More details on all of the risks mentioned above can be found in the full Prospectus.
