Report of the Authorised Corporate Director - Investment Environment

Important Information

With effect from 24 January 2022, EIFS 1 has launched two new sub-funds as follows:

- i) EdenTree Global Impact Bond Fund
- ii) EdenTree Green Future Fund

Share Class Launch

With effect from 24 January 2022, the following share classes were launched in relation to the newly launched sub-funds:

- i) B Class Income Shares
- ii) D Class Income Shares

The Global Investment Environment

2022 was a challenging year for global equities, which fell 7.9% in sterling terms for the year, but the overall decline was eased by a stronger second half performance with stocks gaining 3.9% during the final six months. While the year was a story of two halves for markets, overall sentiment remained unsettled by a series of unexpected events throughout the year. Firstly, inflation proved to be stronger and stubbornly persistent, prompting a robust response for the world's key central banks, led by the Federal Reserve (Fed) which took US interest rates to a 15 year high. Energy and food inflation-concerns continued to be exacerbated by the war in Ukraine; while global supply bottlenecks were aggravated when China's zero-Covid policy resulted in further lockdowns across major manufacturing regions. On a more localised level, political upheaval in the UK – which saw three Prime Ministers and four Chancellors of the Exchequer in as many months – led to high levels of volatility, particularly in the UK government bond (“Gilts”) market. On the other hand, speculation that a likely worldwide recession would prompt central banks to deviate from their tightening course sooner than expected brought buyers back to markets during the final quarter of the year.

United States

For the year, US equities declined 8.4% in sterling terms. However, the scale of the US market's fall was disguised by the US dollar's steep appreciation against sterling as the market fell 18.1% in local currency terms. The second half of the year saw the market claw back some of its first half losses, rising 3.0% in sterling terms. Despite suggestions that US consumer prices peaked at 9.1% in June, the goal of bringing inflation closer to the Fed's 2% target remained at the top of its agenda and the central bank continued to raise interest rates aggressively. Its year-end rhetoric also sought to dampen hopes that this stance would shift in the near term even though the prospect of a 2023 recession was rising. The issue of whether the Fed can achieve a 'soft' economic landing will be pivotal to market activity in the coming year, meaning markets are likely to remain volatile.

Europe ex UK

A strong second half performance helped Europe ex UK equities recover some of their first half losses, with 2022 performance ending at -7.3% following an 11.6% bounce back in H2, both figures in sterling terms. While Europe's proximity to the conflict in Ukraine continued to generate concerns, fears about the region's economic resilience were eased by efforts to wean itself away from Russian energy (notably the RePower EU initiative), government steps to protect consumers and businesses from rising energy prices, as well as a welcome fall in the cost of energy and a relatively mild winter in recent months. Yet, inflation remained a stubborn problem for the region and prompted the European Central Bank to commence raising rates for the first time in a decade. July's hike was followed by further increases in September and December and a warning by chair, Christine Lagarde, that the central bank was not yet 'done'.

United Kingdom

The UK was one of the few developed equity markets to deliver a mildly positive return for 2022, returning 0.2% in sterling terms for the year following a 5.1% gain in the second half. This outlier performance disguised a very challenging period for the UK, where fears over rising inflation – which reached double digits in July and remained at that level for the rest of the year – further rate hikes and widescale worker unrest were exacerbated by political upheaval. Liz Truss's role as Prime Minister proved to be short-lived after her Chancellor's ill-fated “mini-budget” ignited a crisis of confidence in currency and bond markets and forced the Bank of England (BoE) to implement emergency bond buying measures. Calm was restored to markets after her successor, Rishi Sunak, quickly reversed these policies.

Asia Pacific (excluding Japan)

Equities in Asia ex Japan delivered returns of -6.2% for the year, with overall losses being eased thanks to a positive second half performance of 2.4% in sterling terms. Supply chain dislocations and fears of an impending global recession continued to weigh on the region, as did concerns about China's economic health. In fact, China was a major regional laggard during the second half as its zero-Covid policy resulted in further lockdowns across major cities, further inhibiting the nation's economic growth. However, Chinese authorities surprised markets at the end of the year by reversing the country's stringent Covid-19 rules; that said, the move to reopen the Chinese economy may not have the immediate, positive impact intended as infection rates subsequently surged.

Japan

Japanese equities declined a mere 4.4% in 2022 and experienced a gain of 6.8% in the second half, in sterling terms. Q3 earnings revealed that many companies benefitted from the Yen's significant depreciation against the US dollar during the year, although the value of Japan's currency was boosted in December when the Bank of Japan unexpectedly changed policy direction. Its decision to allow 10-year bond yields to rise may not have matched the rate rising agenda of other central banks but did signal an end to its easy monetary stance.

Fixed Income

Another unexpected occurrence in 2022 was that fixed income markets faced similar performance challenges to equities, and in some cases were worse. The rise in yields worldwide (which equate to bond price declines) reflected stronger than expected inflation and the subsequent stronger than expected central bank action. UK gilts experienced further turbulence as a consequence of the aforementioned UK “mini-budget”, with 2-year yields soaring to their highest rates since the financial crisis and sterling falling to a 37-year low. An effective intervention by the BoE quashed instability in the pensions market and the fixed income, and currency markets were later soothed by a reversal of all “mini-budget” proposals.

Outlook

2022's tales of the unexpected are unlikely to end in the coming year. The threat of a worldwide recession is hanging over economies as the New Year commences, although the depth and duration of any economic contraction is unclear. Accordingly, despite efforts by central banks to provide clear guidance regarding ongoing tightening plans, any surprise inflation, employment or other notable economic data will likely provoke strong market reactions as participants strive to anticipate whether the central banks will alter their tough stance in the face of worsening economic conditions.

The geopolitical environment will remain a key topic throughout the year. The conflict in Ukraine currently shows little sign of resolution, causing widespread humanitarian harm as well as challenging attempts to control inflation given the war's impact on energy and food supplies. The relationship between the US and China continues to cool, suggesting the decline of globalisation and the related rise of near-shoring practices will remain strong investment themes. The US's position versus China could gain further credence during the year as US politics steps up a gear ahead of 2024's presidential election.

Corporate news flow will also be closely watched this year, as investors attempt to gauge the extent of the damage being inflicted on company bottom lines by the deteriorating economic environment. While falls in earnings have largely been discounted by equity markets during 2022, these de-ratings were fairly broad-based and could present interesting opportunities to buy quality companies at more attractive valuations on a longer-term view. On the fixed income side, the challenging economic environment could result in a rise in the number of defaults, while refinancing credit could be more of an issue as the cost of borrowing continues to rise and over-indebted companies may struggle to secure finance. That said, yields for quality government and corporate paper are now at levels not seen for many years and could present attractive opportunities on a selective basis.

Recent extreme weather, be that the deadly winter storms in North America or Europe's unexpected January heatwave, serve as a timely reminder that climate change and protecting the environment will continue to be key investment themes. Positive environmental legislation continues to be introduced worldwide, particularly new Brazilian president Lula's zero deforestation pledge, but the recent heightening of energy security concerns highlight that the achievement of climate goals have much further to go.

Yet, it's not just the E of ESG (Environmental, Social and Governance) that needs to be on the investment radar this year. As the world's economic health deteriorates, cost of living challenges are becoming more acute and wealth inequality is widening. The burden of recessions and inflation often unfairly target the most vulnerable in society and we firmly believe, that at times of crisis, more ESG scrutiny should be undertaken, not less. Indeed, as responsible and sustainable investors, engagement with companies is one of the most important aspects of our work, and one which can result in real-world impacts. This year our engagement priorities include biodiversity, human rights in green infrastructure, and financial inclusion, which we conduct in conjunction with targeted company-specific voting engagement work to ensure high levels of corporate responsibility in the businesses we invest in on your behalf.

January 2023

Investment Objective and Policies

These Funds are marketable to retail investors.

These Funds are managed in line with the requirements for inclusion in an Individual Savings Account (ISA). The portfolio will consist primarily of transferable securities but the ACD may also invest in units in collective investment schemes, money-market instruments, derivatives and forward transactions, deposits, nil and partly paid securities, bonds, convertible bonds, cash and near cash as deemed economically appropriate to meet the Funds' objectives.

The ACD does not currently intend to use derivatives for any purpose other than the efficient portfolio management of the Funds, although it may, subject to obtaining and maintaining the requisite permissions from the FCA under the Financial Services and Markets Act 2000 and on giving not less than 60 days notice to shareholders in the Funds, use derivatives in pursuit of their investment objectives in the future. If derivatives are used for the purpose of meeting the investment objectives of the Funds it is not intended that the use of derivatives would cause the Net Asset Value of the Funds to have higher volatility or otherwise cause the existing risk profiles of the Funds to change.

EdenTree Responsible and Sustainable UK Equity Fund

The Fund aims to achieve long-term capital appreciation over five years or more and an income, through a diversified portfolio of UK companies.

The Fund aims to invest at least 80% in UK companies whose primary listing is in the UK by investing in a portfolio of companies which make a positive contribution to society and the environment through sustainable and socially responsible practices.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, conventional weapon production, gambling, publication of violent or explicit materials, intensive farming, fossil fuel exploration and production and high interest (sub-prime) lending.

The Fund will seek to avoid companies with material operations in oppressive regimes. The Fund has a proprietary means of assessing oppressive regime risk, and operates this on a case by case basis. It will also seek to avoid companies that have exposure to the manufacture of unconventional weapons where these are defined as nuclear, biological and chemical weapons, land mines and cluster bombs. Finally, the Fund will seek to avoid companies using animals to test cosmetic, beauty or household products. It will invest in pharmaceuticals companies that may conduct animal testing but will encourage the adoption of the 3R principles: refine, reduce, and replace.

The ACD's responsible and sustainable screening captures the quality and strength of a company's approach to sustainable business. This includes assessing a diverse range of indicators including environment and climate change, conflict minerals, custody of supply in raw materials sourcing (e.g. timber) and pollution etc. By way of example when specifically assessing corporate sustainability as it relates to climate change the ACD would analyse key indicators such as emissions disclosure, how targets are set, whether they are science based and ambitious enough to demonstrate commitment to a low carbon economy and whether the company is providing solutions that support climate resilience, mitigation and / or adaptation.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Change Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

EdenTree Responsible and Sustainable European Equity Fund

The Fund aims to achieve long-term capital growth over five years or more with an income through a diversified portfolio of European (ex-UK) companies.

The Fund seeks to invest at least 80% in European (ex- UK) companies by investing in companies which make a positive contribution to society and the environment through sustainable and socially responsible practices.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, conventional weapon production, gambling, publication of violent or explicit materials, intensive farming, fossil fuel exploration and production and high interest (sub-prime) lending.

The Fund will seek to avoid companies with material operations in oppressive regimes. The Fund has a proprietary means of assessing oppressive regime risk, and operates this on a case by case basis. It will also seek to avoid companies that have exposure to the manufacture of unconventional weapons where these are defined as nuclear, biological and chemical weapons, land mines and cluster bombs. Finally, the Fund will seek to avoid companies using animals to test cosmetic, beauty or household products. It will invest in pharmaceuticals companies that may conduct animal testing but will encourage the adoption of the 3R principles: refine, reduce, and replace.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

EdenTree Responsible and Sustainable Global Equity Fund

The Fund aims to achieve long-term capital growth over five years or more with an income through a diversified portfolio of international (including the UK) companies.

The Fund seeks to invest in a portfolio of companies which make a positive contribution to society and the environment through sustainable and socially responsible practices.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, conventional weapon production, gambling, publication of violent or explicit materials, intensive farming, fossil fuel exploration and production and high interest (sub-prime) lending.

The Fund will seek to avoid companies with material operations in oppressive regimes. The Fund has a proprietary means of assessing oppressive regime risk, and operates this on a case by case basis. The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

EdenTree Responsible and Sustainable Short Dated Bond Fund

The Fund aims to preserve capital and generate a regular income payable quarterly.

The Fund seeks to invest at least 80% in short dated government bonds and debt instruments issued by companies that the ACD believes make a positive contribution to society and the environment through sustainable and socially responsible practices.

In line with the Fund's objective to preserve capital, the Fund will aim to invest at least 80% in sterling denominated fixed interest securities of short duration. Portfolio duration will be expected to average around 2 years, with the anticipated upper limit being 3 years. The portfolio will also look to maintain high credit quality. Securities will usually have a minimum credit rating of A by Moody's, S&P and or Fitch to be considered for investment. A maximum of 10% of the holdings may be invested in BBB-rated debt, seeking a target overall portfolio rating of A or better.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, conventional weapon production, gambling, publication of violent or explicit materials, intensive farming, fossil fuel exploration and production and high interest (sub-prime) lending.

The Fund will seek to avoid companies with material operations in oppressive regimes. The Fund has a proprietary means of assessing oppressive regime risk, and operates this on a case by case basis. It will also seek to avoid companies that have exposure to the manufacture of unconventional weapons where these are defined as nuclear, biological and chemical weapons, land mines and cluster bombs. Finally, the Fund will seek to avoid companies using animals to test cosmetic, beauty or household products. It will invest in pharmaceuticals companies that may conduct animal testing but will encourage the adoption of the 3R principles: refine, reduce, and replace.

The ACD's responsible and sustainable screening captures the quality and strength of a company's approach to sustainable business. The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

EdenTree Responsible and Sustainable Sterling Bond Fund

The Fund aims to generate a regular level of income payable quarterly.

The Fund seeks to invest in a highly diversified portfolio of Government bonds and good quality fixed-interest securities issued by companies which make a positive contribution to society and the environment through sustainable and socially responsible practices. The Fund's investments will be at least 80% denominated in Sterling but the Fund may invest in other currency bonds and securities that the ACD thinks appropriate to meet the investment objective.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, conventional weapon production, gambling, publication of violent or explicit materials, intensive farming, fossil fuel exploration and production and high interest (sub-prime) lending.

The Fund will seek to avoid companies with material operations in oppressive regimes. The Fund has a proprietary means of assessing oppressive regime risk, and operates this on a case by case basis. It will also seek to avoid companies that have exposure to the manufacture of unconventional weapons where these are defined as nuclear, biological and chemical weapons, land mines and cluster bombs. It will invest in pharmaceuticals companies that may conduct animal testing but will encourage the adoption of the 3R principles: refine, reduce, and replace.

The ACD's responsible and sustainable screening captures the quality and strength of a company's approach to sustainable business. This includes assessing a diverse range of indicators including environment and climate change, conflict minerals, custody of supply in raw materials sourcing (e.g. timber) and pollution etc. By way of example when specifically assessing corporate sustainability as it relates to climate change the ACD would analyse key indicators such as emissions disclosure, how targets are set, whether they are science based and ambitious enough to demonstrate commitment to a low carbon economy and whether the company is providing solutions that support climate resilience, mitigation and / or adaptation.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

EdenTree Responsible and Sustainable Managed Income Fund

The Fund aims to exceed the yield of the FTSE 250 Mid-Cap Index, together with capital growth over the longer term, five years or more.

The ACD will seek to achieve the investment objective by investing in a mix of equities, fixed-interest securities and cash equivalents. The Fund will maintain a bias towards equities of 60 – 85%.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, conventional weapon production, gambling, publication of violent or explicit materials, intensive farming, fossil fuel exploration and production and high interest (sub-prime) lending.

The Fund will seek to avoid companies with material operations in oppressive regimes. The Fund has a proprietary means of assessing oppressive regime risk, and operates this on a case by case basis. The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

EdenTree Responsible and Sustainable UK Equity Opportunities Fund

The Fund seeks to achieve long-term capital growth over five years or more with an income.

The Fund aims to invest at least 80% in a range of UK incorporated companies whose primary listing is in the UK which the ACD believes offer good potential for long-term capital growth. The portfolio will consist of at least 80% listed securities with a bias towards small and mid-cap companies and those that the ACD considers are undervalued opportunities. The ACD may also invest in units in collective investment schemes, money-market instruments, derivatives and forward transactions, deposits, nil and partly-paid securities, bonds, convertible bonds, cash and near cash as deemed economically appropriate to meet the Fund's objective.

The Fund seeks to avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, conventional weapon production, gambling, publication of violent or explicit materials, intensive farming, fossil fuel exploration and production and high interest (sub-prime) lending.

The Fund will seek to avoid companies with material operations in oppressive regimes. The Fund has a proprietary means of assessing oppressive regime risk, and operates this on a case by case basis. It will also seek to avoid companies that have exposure to the manufacture of unconventional weapons where these are defined as nuclear, biological and chemical weapons, land mines and cluster bombs. Finally, the Fund will seek to avoid companies using animals to test cosmetic, beauty or household products. It will invest in pharmaceuticals companies that may conduct animal testing but will encourage the adoption of the 3R principles: refine, reduce, and replace.

The ACD's responsible and sustainable screening captures the quality and strength of a company's approach to sustainable business. This includes assessing a diverse range of indicators including environment and climate change, conflict minerals, custody of supply in raw materials sourcing (e.g. timber) and pollution etc. By way of example when specifically assessing corporate sustainability as it relates to climate change the ACD would analyse key indicators such as emissions disclosure, how targets are set, whether they are science based and ambitious enough to demonstrate commitment to a low carbon economy and whether the company is providing solutions that support climate resilience, mitigation and / or adaptation.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Management, Human Rights, and Community Relations and is particularly positive on companies that contribute to Education, Health & Wellbeing, Social Infrastructure and Sustainable Solutions.

EdenTree Global Impact Bond Fund

The Fund seeks to deliver measurable positive environmental and social impact alongside a regular level of income, payable quarterly.

The Fund will seek to achieve the investment objective by investing in a globally diversified set of publically listed fixed interest securities issued by companies that make a positive contribution to society and the environment through sustainable and socially responsible practices. The Fund's investments will have a minimum 80% exposure to impact instruments, which may include ESG-labelled debt such as Green, Social and Sustainable bonds. This exposure will also consist of debt instruments issued by companies contributing to positive measurable environmental and or social outcomes falling under EdenTree's themes of Sustainable Solutions, Social Infrastructure, Health & Wellbeing, Education and or related UN Sustainable Development Goals.

The Fund will avoid investment in certain areas such as companies which have a material involvement (10% or more) in alcohol and tobacco production, conventional weapon production, gambling, publication of violent or explicit materials, intensive farming, fossil fuel exploration and production and high interest (sub-prime) lending.

The Fund will seek to avoid companies with material operations in oppressive regimes. The Fund has a proprietary means of assessing oppressive regime risk, and operates this on a case by case basis. It will also seek to avoid companies that have exposure to the manufacture of unconventional weapons where these are defined as nuclear, biological and chemical weapons, land mines and cluster bombs. Finally, the Fund will seek to avoid companies using animals to test cosmetic, beauty or household products. It will invest in pharmaceuticals companies that may conduct animal testing but will encourage the adoption of the 3R principles: refine, reduce, and replace.

The ACD's responsible and sustainable screening captures the quality and strength of a company's approach to sustainable business. This includes assessing a diverse range of indicators including environment and climate change, conflict minerals, custody of supply in raw materials sourcing (e.g. timber) and pollution etc. By way of example when specifically assessing corporate sustainability as it relates to climate change the ACD would analyse key indicators such as emissions disclosure, how targets are set, whether they are science based and ambitious enough to demonstrate commitment to a low carbon economy and whether the company is providing solutions that support climate resilience, mitigation and / or adaptation.

The Fund favours companies that follow good Business Ethics, Corporate Governance, Employment & Labour practices, Environment and Climate Change Management, Human Rights, and Community.

EdenTree Green Future Fund

The Fund seeks to provide long term capital growth over 5 years or more with an income by investing globally in companies which, at the core of their business, provide sustainable solutions to some of the world's environmental challenges.

The Fund will seek to achieve the investment objective by investing at least 80% of the Fund globally in shares of companies whose core products and services address global sustainability challenges, with a particular focus on the environment. Up to 20% of the Fund may be invested in other assets, including shares of other companies, open-ended funds (including funds managed by EdenTree and its associates), money-market instruments, derivatives and forward transactions, deposits, nil and partly-paid securities, bonds, convertible bonds, cash and near cash as deemed economically appropriate to meet the Fund's objective.

The Fund will avoid investment where there is material involvement (10% or more) in alcohol and tobacco production, conventional weapon production, gambling, publication of violent or explicit materials, intensive farming, fossil fuel exploration and production and high interest (sub-prime) lending.

The Fund will avoid companies with material operations in oppressive regimes. The Fund has a proprietary means of assessing oppressive regime risk, and operates this on a case by case basis. It will also seek to avoid companies that have exposure to the manufacture of unconventional weapons where these are defined as nuclear, biological and chemical weapons, land mines and cluster bombs. Finally, the Fund will seek to avoid companies using animals to test cosmetic, beauty or household products. It will invest in pharmaceuticals companies that may conduct animal testing but will encourage the adoption of the 3R principles: refine, reduce, and replace.

Risk Profile

EdenTree Responsible and Sustainable UK Equity Fund

Most of the assets will be invested in the UK stock market so could be affected by any change in this market.

Selecting stocks due to our responsible & sustainable criteria means that the choice of stocks is limited to a sub set of the stock market and this could lead to greater volatility.

EdenTree Responsible and Sustainable European Equity Fund

The investment's value may be affected by changes in exchange rates.

The entire market of European stocks and shares might decline thus affecting the prices and values of the assets.

Selecting stocks due to our responsible & sustainable criteria means that the choice of stocks is limited to a subset of the stock market and this could lead to greater volatility.

EdenTree Responsible and Sustainable Global Equity Fund

The investment's value may be affected by changes in exchange rates.

The equity markets invested in might decline thus affecting the prices and values of the assets.

Some of the investments may be in emerging markets, which can be more volatile and carry risks associated with changes in their economy and political status. Also they may not offer the same level of investor protection as would apply in more developed jurisdictions.

Selecting stocks due to our responsible & sustainable criteria means that the choice of stocks is limited to a sub set of the stock market and this could lead to greater volatility.

EdenTree Responsible and Sustainable Short Dated Bond Fund

The investment's value may be affected by changes in inflation and interest rates.

An issuer of a fixed interest security held within the Fund may default, causing a reduction in the capital and income value of the Fund.

Selecting stocks due to our responsible & sustainable criteria means that the choice of stocks is limited to a subset of the stock market and this could lead to greater volatility.

EdenTree Responsible and Sustainable Sterling Bond Fund

The Fund holds a variety of different fixed interest securities including government and corporate bonds, preference shares and permanent interest bearing shares with a spread of durations. The Fund may invest in index or inflation linked bonds as well as conventional fixed interest instruments. Some of the bonds hold credit ratings however the Fund also invests in unrated bonds and other fixed interest instruments.

The investment's value may be affected by changes in inflation and interest rates.

An issuer of fixed interest stock may default, so causing a reduction in the capital and income value of the Fund.

The annual management charge is taken from capital not income so the capital value of the Fund could be reduced over time.

Selecting stocks due to our responsible & sustainable criteria means that the choice of stocks is limited to a sub set of the stock market and this could lead to greater volatility.

EdenTree Responsible and Sustainable Managed Income Fund

The equity markets invested in might decline thus affecting the prices and values of the assets.

The Fund holds Corporate and Government bonds of a spread of durations. The various bonds have a spread of different security ratings as the investment managers do not set minimum security standards for such bonds.

The annual management charge is taken from capital not income so the capital value of the Fund could be reduced over time.

An issuer of fixed interest stock may default, so causing a reduction in the capital and income value of the Fund.

The investment's value may be affected by changes in exchange rates and interest rates.

Selecting stocks due to our responsible & sustainable criteria means that the choice of stocks is limited to a sub set of the stock market and this could lead to greater volatility.

EdenTree Responsible and Sustainable UK Equity Opportunities Fund

Most of the assets will be invested in the UK stock market so could be affected by any change in this market.

Selecting stocks due to our responsible & sustainable criteria means that the choice of stocks is limited to a sub set of the stock market and this could lead to greater volatility.

EdenTree Global Impact Bond Fund

The investment's value may be affected by changes in inflation, interest rates and exchange rates.

An issuer of fixed interest stock may default, so causing a reduction in the capital and income value of the Fund.

The annual management charge is taken from capital not income so the capital value of the Fund could be reduced over time.

Selecting stocks due to our responsible & sustainable criteria means that the choice of stocks is limited to a sub set of the stock market and this could lead to greater volatility.

EdenTree Green Future Fund

The investment's value may be affected by changes in exchange rates.

The equity markets invested in might decline thus affecting the prices and values of the assets.

Selecting stocks due to our responsible & sustainable criteria means that the choice of stocks is limited to a sub set of the stock market and this could lead to greater volatility.

EdenTree Responsible and Sustainable UK Equity Fund

Report of the Authorised Corporate Director

This review covers the year from 1 January 2022 to 31 December 2022.

Over the year, the Fund returned -20.1% underperforming both the FTSE All-Share Index of -3.2% and the IA All Companies sector average of -9.2% both measured on a similar basis.

As at 31 December 2022, 49% of the Fund was invested in FTSE 100 companies, 33% was invested in companies in the FTSE 250 Mid Cap Index, and 16% in smaller companies. The cash balance remains approximately 2%.

Stock returns across the market continued to be dominated by macro-economic and geopolitical considerations which have created a great deal of uncertainty for short term corporate earnings but also some exciting valuations for companies with strong and growing market positions, including innovative businesses with leading technology, products or operations that are hard to replicate, providing strong economic moats.

Nevertheless, it has been a difficult year for the Fund and, more broadly, a torrid year for our investment approach, which tends to be growth focused with a bias to UK domestic companies. Fossil fuel companies, which we cannot invest in and large companies whose revenues are in dollars, have dominated – and distorted – the returns of the FTSE All Share Index this year. This is shown starkly by the divergent performances of the FTSE100 and the more domestically focused FTSE 250 index which has returned 4.7% and -17.4% respectively during the year.

The FTSE 250 has suffered a similar decline as major stock indices in the US, Europe and many other parts of the world. Similarly, there has been a marked divergence in the performance of global growth and quality indices, areas in which we tend to invest, and value this year. While we are disappointed by the Fund's recent performance, we are confident about portfolio positioning and remain extremely close to the companies in which we invest. Moreover, times such as we are seeing now when the market is ultra-focused on short-term earnings can create exciting opportunities to investors such as ourselves, who appraise corporate prospects on a three-to-five-year horizon, a period over which the true value of a business can be realised.

The Manager's responsible and sustainable screening process excludes direct investments in Mining, Defence, Gambling, Oil & Gas Producers and Tobacco & Alcohol Production. The zero exposure to Oil & Gas, Mining, Tobacco and Aerospace & Defence was a headwind for performance. In addition, the underweight in Banks and overweight in Non-Life Insurance, Pharmaceuticals & Biotechnology and Software & Computer Services acted as a drag on performance. The overweight in Industrial Transportation and underweight in REITs was a tailwind.

From a sector allocation perspective, the Fund benefited from overweight positions in Pharmaceuticals & Biotechnology and Electrical & Electric Equipment and zero exposure to Tobacco. Overweight positions in Medical Equipment & Services and Life Insurance and zero exposure to Oil, Gas & Coal and Mining negatively influenced performance. At a stock level, the largest positive contributions were made by Bioventix (Pharmaceuticals & Biotechnology) and John Menzies (Support Services). Detractors included Dechra (Pharmaceuticals & Biotechnology), Strix (Industrial Products), Halma (Industrial Equipment) and National Express (Industrial Services).

Existing holdings were increased in National Express, NCC, Wise, XPP, Sabre Insurance, Mattioli Woods, Marshalls, Strix, Close Brothers, Ashtead, Genus, Phoenix, Rentokil, Mears, Keller, Bioventix, Victrex, Taylor Wimpey, Prudential, Oxford Instruments and Porvair. Notable new holdings were established in Spirax-Sarco, Segro, Harmony Energy, Morgan Advanced, Unite, Croda, BlueField Solar and Natwest. We exited IP Group, John Menzies, Trifast, FeverTree, Inland Homes and Haleon. The positions in Halma and AstraZenca were trimmed on the back of strong performance.

Prospects

The prolonged conflict in Ukraine will likely result in continued high commodity prices, high inflation and adverse economic impacts. The ending of China's zero-Covid policy has led to outbreaks in major cities which could lead to short term disruption and its impact will be unpredictable with reverberations likely to be felt around the world. Relations between the UK and EU have somewhat thawed under new Prime Minister Rishi Sunak, although a long-term solution over the implementation of trading arrangements for Northern Ireland are still required. Increases in the cost of living will likely mean negative implications for consumer spending. Conservative Party infighting over various aspects of government policy could result in elevated political risk. Labour disputes are likely to be a feature going forward as wage increases fail to keep pace with inflation and disputes could spread across even more industries. European economic activity is likely to be impacted by its proximity to the conflict in Ukraine. The Democrats performed better than expected in US mid-term elections although the loss of a majority in the House of Representatives could mean that President Biden will find it difficult to enact his legislative agenda for the rest of his first term in office. Central bankers around the world have continued to increase interest rates in order to combat inflation and the economic impact of less accommodative monetary policy could be painful. Whether inflation in fact has peaked and the extent of potential further rate increases going forward, will have a large impact on investor sentiment. While, as ever, some political and economic risks lie ahead, we remain focused on finding new opportunities in companies that meet our strict criteria of strong earnings growth, high margins and strong cash flows. The Fund continues to take in material inflows.

Comparative Tables

The Comparative Tables give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables are calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades. Research costs are no longer part of the broker charges.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by a fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

Risk Reward Profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.

For example a share class whose price has experienced very significant rises and falls will be in a higher risk category, whereas, a share class whose price has experienced less significant rises and falls will be in a lower risk category.

As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.

Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

The Share Class is in risk category 6 as its price has experienced very significant rises and falls historically.

EdenTree Responsible and Sustainable European Equity Fund

Report of the Authorised Corporate Director

This review covers the year from 1 January 2022 to 31 December 2022.

Over the year under review, the EdenTree Responsible and Sustainable European Equity Fund posted a modest gain, generating a total return of 0.1% for the year. This nevertheless represented a material outperformance relative to its FTSE World Europe ex UK TR GBP benchmark, which returned -7.0%.

2022 was a hugely volatile year for European equity markets. Existing inflationary pressures and supply chain disruptions were exacerbated by the Russian invasion of Ukraine, which commenced in February and showed no sign of resolution by the year-end. Given Europe's dependence on Russian energy supplies, it found itself in a particularly vulnerable position. The European Commission sought to reduce dependence on Russian oil and gas by accelerating the development of renewable energy – among other things – through its new RePowerEU plan. Energy supply fears were reignited in the third quarter when the Nord Stream gas pipelines were shut down and subsequently damaged, presumably through an act of sabotage. Beyond the energy crisis, central banks' ongoing efforts to combat inflation also dictated market activity. Following the Federal Reserve's hawkish lead, the European Central Bank initiated a series of rate hikes that saw the refinancing rate reach 2.5% by the end of the year, a fourteen-year high. However, with inflation seeming to have peaked at 10.6% in October, hopes that central banks may start to reverse course saw global equities – including European stocks – stage a robust fourth-quarter recovery. In Europe, market sentiment was further supported by the euro recovering from its slump against the US dollar, having previously reached a 20-year low.

Most of the Fund's relative outperformance can be attributed to stock selection. Among the year's top contributors were banking stocks, including Bank of Ireland, Societe Generale (France) and ABN Amro (Netherlands), as the sector generally benefited from higher interest rates and, hence, improved net interest margins, as well as relatively resilient consumer demand at a time of higher living costs. The European Union's push towards a low carbon economy supported the valuations of some of the Fund's holdings, including Rexel, Greencoat Renewables, Prysmian and Mersen. Among the detractors were holdings in Dutch conglomerate Philips, which saw performance impacted by operational and supply challenges.

The pronounced outperformance of value shares compared to growth during the year also provided a strong tailwind for the Fund, which particularly benefited from its underweight exposure to technology stocks. On the other hand, having nil exposure to the Energy sector, which is not held on Responsible and Sustainable grounds, was negative for relative performance.

In terms of notable transactions, we divested from Swedish telecoms equipment manufacturer Ericsson in February following news that it may have made payments to terrorist organisations to secure transport routes through Iraq. We took profits from Schneider Electric in the third quarter, believing it to be fully valued, and used the proceeds to add to a number of cyclical holdings we felt had become oversold amid concerns about the economic outlook, balancing these purchases with additions to some defensive names, including the healthcare sector. We also exited from Hugo Boss, following a period of strong performance and switched these profits into Adidas, which has a strong long-term growth outlook.

Prospects

While we are mindful that Europe still faces several headwinds (the war in Ukraine being the most notable of these), we believe the forthcoming economic downturn could end up being relatively shallow. Economic data has tended to confound the more pessimistic economic views, for example, Germany avoided recession in Q4. However, labour conditions remain tight in many parts of the region and, while inflation may have peaked, it is likely to remain well above central bank targets suggesting the period of tight interest rate policies could prove to be more protracted than many investors are hoping for.

Despite this mixed backdrop, we continue to see areas of value in the market, whether cyclical or defensive, which offer attractive opportunities for the long term. Furthermore, many of the companies we have spoken to remain surprisingly upbeat despite coming under pressure from the rise in energy and commodity prices, as well as interest rates. While this resilience is notable, guidance is starting to reflect the more challenging backdrop and earnings could come under further pressure in 2023.

EdenTree Responsible and Sustainable European Equity Fund

Risk Reward Profile

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.

For example a share class whose price has experienced very significant rises and falls will be in a higher risk category, whereas, a share class whose price has experienced less significant rises and falls will be in a lower risk category.

As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.

Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

The Share Class is in risk category 6 as its price has experienced very significant rises and falls historically.

EdenTree Responsible and Sustainable Global Equity Fund

Report of the Authorised Corporate Director

This review covers the year from 1 January 2022 to 31 December 2022.

Over the year under review, the Fund returned -17.9%, underperforming the -7.2% return of the FTSE World GBP Total Return Index. Overall, the Fund ranked third quartile for performance amongst the IA Global peer group.

At a sector level, the strong performance of the carbon-intensive energy sector was the largest headwind to the Fund, given the sector returned 61.5% over the year and the Fund's nil allocation to oil & gas. Technology was the worst performing sector returning -26.5%, with the Fund not holding Amazon, Facebook or Apple a positive for performance. However, several of the Fund's US technology holdings were still swept up in the growth selloff with Paypal, Salesforce and Alphabet detractors to performance.

At the country level, the UK stock market was the best performing market amongst major peers, with the index returning +3.1%, helped by the market's outsized weighting in fossil fuel and mining stocks (both sectors not held), greater value orientation, and the positive impact of sterling weakness on high overseas earnings. Meanwhile, in a reversion of previous years, the US was the worst performing region returning -9.1%. Overall the UK overweight and US underweight was a positive to performance but stock selection was a detractor within these regions.

Despite the challenging backdrop, there were several highlights at the stock level. Most notably, Valmont Industries, an infrastructure business that has exposure to the renewable energy and agriculture sectors, rallied by c.50% with the business well placed to benefit from the clean energy stimulus measures as part of the Inflation Reduction and Act in the US. Other positive holdings included Federal Signal (advanced warning signals), ASR Nederland (insurance) and Novartis (healthcare).

The Fund's relative value tilt was a positive given the large correction in growth stocks in the rising rate environment with MSCI World Growth Index (-20.6%) underperforming MSCI World Value Index (+5.4%). The higher interest rate environment led to a correction of growth equities as higher discount rates were applied to future cash flows.

Over the year, we took the opportunity to manage our risk and reduce our overweight to the industrial sector. We reduced our positions in US industrials Advanced Drainage Systems, Valmont and Federal Signal following strong rallies. Following the news of the buyout of Biffa, we added a new holding, French-based waste management leader Veolia. We also entered a new position in SolarEdge, the leading provider of module level power electronics (MLPE) solutions for solar power modules. With delays of up to two years in the permit process for wind energy, we felt the market led solution offered by SolarEdge, which utilises residential solar, was likely to see particularly strong demand, particularly at a time when Russia's invasion of Ukraine has brought the issue of energy security to the fore.

Prospects

Entering the new year, risk has shifted from inflation to growth. Many economies face the rising spectre of recession, which has been well signposted with lowered expectations in asset prices providing some cushion. A Federal Reserve pivot is now widely anticipated by the market, and we would expect a pause at these higher levels given recent Fed messaging and the fact that the lagging indicator of unemployment is still extremely robust overall despite headline job cuts in the tech industry.

A source of global upside risk is the reopening of China, following years of strict Covid policies. In the short term, we anticipate disruption and the further impact to global supply chains from infections, but over the year we expect Asia to benefit from the full reopening of this key economy. From a positioning perspective, we are overweight Asia given this dynamic is coupled with attractive valuations.

We see limited risk of a European energy crunch over the first months of 2023. However close attention is required to the refilling of reserves post-winter with a potentially resurging Chinese economy competing in LNG markets. While Europe has moved to diversify away from Russian gas, the potential need to source enough supplies for winter will be a recurring theme for several years until the continent becomes more energy independent and more efficient. This transition creates considerable long duration opportunities for green energy enablers, related infrastructure and energy efficiency. Given this backdrop, we remain optimistic that the reversal of US outperformance over Europe, seen in Q4, will continue. The valuation divergence between the US and Europe remains wide with respective forward PEs of 16.4x and 12.4x.

The plethora of risks in 2023 has created a dynamic investing environment, which we believe favours stock pickers such as ourselves. The detox from stimulus and loose monetary policy will be a tough process for the market overall, but given our methodology and valuation discipline, which focuses on providing sustainability at a reasonable price, we feel the Fund remains well positioned for the prevailing environment.

EdenTree Responsible and Sustainable Global Equity Fund

Comparative Tables

The Comparative Tables give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables are calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades. Research costs are no longer part of the broker charges.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by a fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

EdenTree Responsible and Sustainable Global Equity Fund

Risk Reward Profile

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.

For example a share class whose price has experienced very significant rises and falls will be in a higher risk category, whereas, a share class whose price has experienced less significant rises and falls will be in a lower risk category.

As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.

Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

The Share Class is in risk category 6 as its price has experienced significant rises and falls historically.

EdenTree Responsible and Sustainable Short Dated Bond Fund

Report of the Authorised Corporate Director

This review covers the year from 1 January 2022 to 31 December 2022.

Over the year under review, the Fund declined by -5.2%, outperforming the iBoxx Sterling Non-Gilt 1 to 5 years ex BBB Index benchmark return of -6.6% as well as the broader IA Sterling Corporate Bond sector average total return of -16.3%.

As risk sentiment weakened, rising gilt yields were the dominant factor behind performance as the potential for tighter monetary policy grew in response to higher-than-expected inflation data. This was notably apparent in longer-dated maturities, with the Bank of England enacting a total 3.25% of rate hikes over the year. The Fund's allocation to higher quality credit proved beneficial.

The primary reason for the Fund's outperformance was its shorter relative duration position.

Whilst the Fund's term structure positioning in quasi-government debt contributed adversely to performance, this was more than offset by its overall lower duration. This included the benefit derived from its raised allocation to floating rate notes during the period, as chances of rate hikes grew.

Prospects

The market remains focused on the path for inflation in anticipating the terminal level of interest rates set by global central banks. Should consumer prices slow decisively, hiking cycles may peak. In restoring price stability, central banks are also likely to be wary of 'over-tightening' given the lag with which monetary policy effects materialise.

As such, global central banks have moderated the pace of hawkish policy action for the immediate future even while maintaining guidance that there is more work to do. In addition, a slowing global economy indicated by survey data dampens the outlook for demand, which could also have adverse implications on labour markets. For the UK in particular, labour market disquiet has been a growing theme. The latter could well persist through the year with core inflation proving stickier and as targeted temporary fiscal support on energy costs wears off, further hampering real wage growth. A cautious stance towards credit is warranted, given heightened recession risks that could well result in increased corporate default rates. We retain a bias towards higher quality corporate bonds, which now offer more attractive risk-adjusted yield, complimented by a larger allocation to government debt to guard against wider risk premia as the global economy decelerates.

We remain vigilant in seeking out opportunities to add to high quality credits, scrutinising the robustness of business models and cash flows to ensure adequate compensation for risk. Whereas, we are adding interest rate sensitivity, we continue to view the Fund's overall shorter relative duration profile as appropriate. Having reduced cash, we are also relying on higher credit quality to enhance overall portfolio liquidity whilst preserving capital.

Risk Reward Profile

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.

For example a share class whose price has experienced very significant rises and falls will be in a higher risk category, whereas, a share class whose price has experienced less significant rises and falls will be in a lower risk category.

As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.

Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

The Share Class is in risk category 3 as its price has experienced moderate rises and falls historically.

EdenTree Responsible and Sustainable Sterling Bond Fund

Report of the Authorised Corporate Director

This review covers the year from 1 January 2022 to 31 December 2022.

Over the year under review, the Fund fell by -13.63%, significantly ahead of the iBoxx Sterling Non-Gilt Index benchmark return of -17.72% but below the IA Sterling Strategic sector average of -11.7%.

As risk sentiment weakened, rising gilt yields were the dominant factor behind performance as the potential for tighter monetary policy grew in response to higher-than-expected inflation data. This was notably apparent in longer-dated maturities, with the Bank of England enacting a total 3.25% of rate hikes over the year. The Fund's allocation to higher quality credit proved beneficial.

The primary reason for the Fund's outperformance was its shorter relative duration position.

Credit selection was also a positive contributor to performance, with higher quality selection on some of the Fund's holdings mitigating the downward price effect from rising gilt yields.

Prospects

The market remains focused on the path for inflation in anticipating the terminal level of interest rates set by global central banks. Should consumer prices slow decisively, hiking cycles may peak. In restoring price stability, central banks are also likely to be wary of 'over-tightening' given the lag with which monetary policy effects materialise.

As such, global central banks have moderated the pace of hawkish policy action for the immediate future even while maintaining guidance that there is more work to do. In addition, a slowing global economy indicated by survey data dampens the outlook for demand, which could also have adverse implications on labour markets. For the UK in particular, labour market disquiet has been a growing theme. The latter could well persist through the year with core inflation proving stickier and as targeted temporary fiscal support on energy costs wears off, further hampering real wage growth. A cautious stance towards credit is warranted, given heightened recession risks that could well result in increased corporate default rates. We retain a bias towards higher quality corporate bonds, which now offer more attractive risk-adjusted yield, complimented by a larger allocation to government debt to guard against wider risk premia as the global economy decelerates.

We remain vigilant in seeking out opportunities to add to high quality credits, scrutinising the robustness of business models and cash flows to ensure adequate compensation for risk. Whereas, we are adding interest rate sensitivity, we continue to view the Fund's overall shorter relative duration profile as appropriate. Having reduced cash, we are also relying on higher credit quality to enhance overall portfolio liquidity whilst preserving capital.

EdenTree Responsible and Sustainable Sterling Bond Fund

Comparative Tables

The Comparative Tables give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables are calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades. Research costs are no longer part of the broker charges.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by a sub-fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

Risk Reward Profile

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.

For example a share class whose price has experienced very significant rises and falls will be in a higher risk category, whereas, a share class whose price has experienced less significant rises and falls will be in a lower risk category.

As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.

Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

The Share Class is in risk category 4 as its price has experienced moderate rises and falls historically.

EdenTree Responsible and Sustainable Managed Income Fund

Report of the Authorised Corporate Director

This review covers the year from 1 January 2022 to 31 December 2022.

Over the period under review, the EdenTree Responsible and Sustainable Managed Income Fund generated a total return of -7.0%, underperforming its main comparator benchmark, the FTSE All-Share Index, which returned 0.3%, but outperforming its IA Mixed Investments 40-85% Shares sector average return of -10.1%.

Sharply rising interest rates, persistently high inflation and the effects of Russia's war in Ukraine on energy and commodity markets led to a significant reappraisal of stock and bond market valuations during the year. Several market indices fell into bear market territory (ie, fell by over 20%), before recovering ground in the final quarter of the year. The Federal Reserve embarked on an aggressive monetary tightening programme, lifting its target rate to a 4.25-4.5% range, the highest level since 2007, with central banks in the UK and Europe also tightening policy. A number of pressures eased towards the end of the year with the prospect that inflation might have peaked. Moreover, unseasonably warm weather in Europe helped to avert a potential gas crisis, which seemed almost certain in the summer after Russia shutdown the Nord Stream gas pipelines. Nevertheless, many market commentators (including the IMF) continued to forecast a recession for many countries in the year ahead.

Over the period, the UK's FTSE All-Share achieved a modest gain of 0.3%, driven by the notable contribution of energy and mining stocks to the market's overall gain. This was in stark contrast to the performance of the FTSE250 Index, which returned -17.4%. Meanwhile, European markets lost ground with the FTSE World Europe Index ex-UK returning -7.3%. The US was a notable laggard, with the S&P500 returning -8.4%, while the tech-heavy Nasdaq returned -24.5%. Bond yields rose sharply during the period. In equities, the Energy sector significantly outperformed, while Consumer Discretionary and Information Technology were notable laggards. In terms of market internals, value shares outperformed growth.

Fund review

The Fund lost ground during the year with the portfolio of UK equities proving to be the largest impediment to relative returns, despite a strong recovery towards the end of the year. This was largely due to the strong performance of the Energy and Basic Materials (mining) sectors which we do not hold given our focus on Responsible and Sustainable investing. In contrast, the overseas equities portfolio gained both in absolute and relative terms, with the Fund's sizeable weighting in European equities proving beneficial for performance. The value bias to this exposure was also positive for relative returns. The fixed income portfolio produced mixed results, with the portfolio outperforming solidly due to its short duration and quality bias.

Financial sector holdings Standard Chartered, HSBC, Talanx and ABN AMRO Bank made notable contributions to performance, with the sector benefiting from rising interest rates which positively impact net interest margins. Electrical power and materials business Mersen also made a solid contribution. The biggest detractors from performance were Synthomer, International Distribution Services and BT Group.

We tactically sought to lock in profits in stocks that had become fully valued on a short-term view, recycling capital during periods of market weakness or in names that had been neglected despite sound fundamentals. Noteworthy new positions included US med-tech spinal and dental implant specialist Zimvie, which was spun out of Zimmer, and in marine services company James Fisher & Sons. Notable sales included, Taiwan Semiconductor Manufacturing Company, following strong performance, and Bristol-Myers Squibb.

Prospects

Financial markets have had a positive start to 2023, in part driven by a softening of economic data in the US, where headline inflation has dropped back to 6.5%, while core inflation, a measure that excludes items over which Fed policy has little control, also edged down. While superficially this might seem like positive news, the market's response highlights what might be a persistent risk this year; namely, that the market underestimates the length of the tightening cycle. The job market remains tight and consumer spending is still relatively robust, despite cost-of-living pressures. Moreover, while the higher interest rate environment has certainly tightened conditions for borrowers (corporate and individual), the full effects of tighter policy will take time to work through. Central banks will be keen not to relax policy too soon, even if rates plateau towards the middle of the year.

We therefore believe a value approach to equities should continue to perform well this year, and we continue to favour Europe and the UK over the US. We are also reluctant to significantly increase fixed income exposure and are maintaining a relatively short duration and focus on quality, given the tightening cycle has further to run and there is increased default risk in the market. We also continue to favour green infrastructure, which offers a solid yield and has defensive characteristics.

Overall, the Fund remains well diversified and is positioned to benefit from the prevailing economic backdrop.

Risk Reward Profile

Lower risk

Typically lower rewards

Higher risk

Typically higher rewards

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.

For example a share class whose price has experienced very significant rises and falls will be in a higher risk category, whereas, a share class whose price has experienced less significant rises and falls will be in a lower risk category.

As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.

Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

The Share Class is in risk category 5 as its price has experienced significant rises and falls historically.

EdenTree Responsible and Sustainable UK Equity Opportunities Fund

Report of the Authorised Corporate Director

This review covers the year from 1 January 2022 to 31 December 2022.

Against a volatile backdrop, the Fund lost ground in absolute and relative terms during the year. Over the year, the share price of the UK Equity Opportunities Fund decreased by -24.4%, underperforming both the increase in the FTSE All-Share Index of 0.3% and the decrease in the IA All Companies sector average of -9.2%, both measured on a similar basis.

Stock returns across the market continued to be dominated by macro-economic and geopolitical considerations which have created a great deal of uncertainty for short term corporate earnings, but also some exciting valuations for companies with strong and growing market positions, including innovative businesses with leading technology, products or operations that are hard to replicate, providing strong economic moats.

Nevertheless, it has been a difficult period for the Fund and, more broadly, a torrid year for our investment approach, which tends to be growth focused with a bias to UK domestic companies. Fossil fuel companies, which we cannot invest in and large companies whose revenues are in dollars, have dominated – and distorted – the returns of the FTSE All Share Index this year. This is shown starkly by the divergent performances of the FTSE100 and the more domestically focused FTSE 250 index which has returned 4.6% and -17.4% respectively during the year.

The FTSE 250 has suffered a similar decline as major stock indices in the US, Europe and many other parts of the world. Similarly, there has been a marked divergence in the performance of global growth and quality indices, areas in which we tend to invest, and value this year. While we are disappointed by the Fund's recent performance, we are confident about portfolio positioning and remain extremely close to the companies in which we invest. Moreover, times such as we are seeing now when the market is ultra-focused on short-term earnings can create exciting opportunities to investors such as ourselves who appraise corporate prospects on a three-to-five-year horizon, a period over which the true value of a business can be realised.

As at 31 December 2022, 48% of the Fund was invested in FTSE 100 companies, 23% was invested in companies in the FTSE 250 Mid Cap Index, and 24% in other smaller companies. Cash holdings were less than 6%.

The Fund's above average exposure to smaller size companies contributed to underperformance. From a sector allocation perspective, the fund benefited from underweight positions in Closed End Investments and Real Estate Investment Trusts. Overweight positions in Investment Banking & Brokerage Services and Software & Computer Services and zero exposure in Industrial Metals & Mining and Oil, Gas & Coal negatively impacted performance.

At a stock level, the largest positive contributions were made by 4imprint (due to strong trading and earnings upgrades), Convatec (strong trading), and Hollywood Bowl (strong trading). Detractors included Marlowe (elevated financial leverage), Liontrust (negative market movements), Future (cautious outlook) and St James's Place (negative market movements).

We used the volatility in the market to start a position in Zinc Media, a television and content creation company, via an equity raise. We increased our position in Next. We took profits in AstraZeneca, Smith & Nephew and 4imprint and reduced our position in Aquis Exchange. We sold out of IG Design, Shaftesbury, Argentex, Rotork, Burberry, Future, S4 Capital and JD Sports.

Prospects

The prolonged conflict in Ukraine will likely result in continued high commodity prices, high inflation and adverse economic impacts. The ending of China's zero-Covid policy has led to outbreaks in major cities which could lead to short term disruption and its impact will be unpredictable with reverberations likely to be felt around the world. Relations between the UK and EU have somewhat thawed under new Prime Minister Rishi Sunak, although a long-term solution over the implementation of trading arrangements for Northern Ireland are still required. Increases in the cost of living will likely mean negative implications for consumer spending. Conservative Party infighting over various aspects of government policy could result in elevated political risk. Labour disputes are likely to be a feature going forward as wage increases fail to keep pace with inflation and disputes could spread across even more industries. European economic activity is likely to be impacted by its proximity to the conflict in Ukraine. The Democrats performed better than expected in US mid-term elections although the loss of a majority in the House of Representatives could mean that President Biden will find it difficult to enact his legislative agenda for the rest of his first term in office. Central bankers around the world have continued to increase interest rates in order to combat inflation and the economic impact of less accommodative monetary policy could be painful. Whether inflation in fact has peaked and the extent of potential further rate increases going forward, will have a large impact on investor sentiment. While, as ever, some political and economic risks lie ahead, we remain focused on finding new opportunities in companies that meet our strict criteria of strong earnings growth, high margins and strong cash flows. The Fund's focused and disciplined investment strategy has delivered material outperformance over the FTSE All Share over 10 years.

EdenTree Responsible and Sustainable UK Equity Opportunities Fund

Comparative Tables

The Comparative Tables give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables are calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades. Research costs are no longer part of the broker charges.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by a fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

EdenTree Responsible and Sustainable UK Equity Opportunities Fund

Risk Reward Profile

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.

For example a share class whose price has experienced very significant rises and falls will be in a higher risk category, whereas, a share class whose price has experienced less significant rises and falls will be in a lower risk category.

As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.

Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

The Share Class is in risk category 6 as its price has experienced very significant rises and falls historically.

EdenTree Global Impact Bond Fund

Report of the Authorised Corporate Director

This review covers the period from 24 January 2022 to 31 December 2022.

Over the period under review (from initiation), the Fund fell by -13.5%, significantly ahead of the iBoxx Global Green, Social, Sustainability Index benchmark return of -16.9% but below the IA Global Corporate Bond Index average of -10.6%.

As risk sentiment weakened, rising government bond yields were the dominant factor behind performance as the potential for tighter monetary policy grew in response to higher-than-expected inflation data. This was notably apparent in longer-dated maturities, with the major central banks embarking on an aggressive hiking cycle over the year. The Fund's allocation to higher quality credit proved beneficial.

The primary reason for the Fund's outperformance was its shorter relative duration position.

Credit selection was also a positive contributor to performance, with higher quality selection on some of the Fund's holdings mitigating the downward price effect from rising government bond yields.

Prospects

The market remains focused on the path for inflation in anticipating the terminal level of interest rates set by global central banks. Should consumer prices slow decisively, hiking cycles may peak. In restoring price stability, central banks are also likely to be wary of 'over-tightening' given the lag with which monetary policy effects materialise.

As such, global central banks have moderated the pace of hawkish policy action for the immediate future even while maintaining guidance that there is more work to do. In addition, a slowing global economy indicated by survey data dampens the outlook for demand, which could also have adverse implications on labour markets. For the UK in particular, labour market disquiet has been a growing theme. The latter could well persist through the year with core inflation proving stickier and as targeted temporary fiscal support on energy costs wears off, further hampering real wage growth. A cautious stance towards credit is warranted, given heightened recession risks that could well result in increased corporate default rates. We retain a bias towards higher quality corporate bonds, which now offer more attractive risk-adjusted yield, complimented by a larger allocation to government debt to guard against wider risk premia as the global economy decelerates.

We remain vigilant in seeking out opportunities to add to high quality credits, scrutinising the robustness of business models and cash flows to ensure adequate compensation for risk. Whereas, we are adding interest rate sensitivity, we continue to view the Fund's overall shorter relative duration profile as appropriate. Having reduced cash, we are also relying on higher credit quality to enhance overall portfolio liquidity whilst preserving capital.

EdenTree Global Impact Bond Fund

Comparative Tables

The Comparative Tables give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables are calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades. Research costs are no longer part of the broker charges.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by a sub-fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

Risk Reward Profile

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.

For example a share class whose price has experienced significant rises and falls will be in a higher risk category, whereas, a share class whose price has experienced less significant rises and falls will be in a lower risk category.

As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.

Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

The Share Class is in risk category 4 as its price has experienced moderate rises and falls historically.

EdenTree Green Future Fund

Report of the Authorised Corporate Director

This review covers the period from 24 January 2022 to 31 December 2022.

Over the period under review, the Fund returned -2.9% compared with the IA Global sector average return of -2.0%. The FTSE World TR GBP returned -1.3% for the period.

Global equity markets were dominated by macro-economic and geopolitical concerns during the year under review. Russia's war in Ukraine sparked an energy crisis and led Europe to rapidly reorientate its energy sector away from Russian supply, including through the introduction of more ambitious renewable energy and energy efficiency goals. Inflation surged to multi-decade highs, forcing central banks to lift rates to levels not seen since before the Global Financial Crisis. Market sentiment improved in the final quarter of the year as investors spied a peak in inflation and moderation in central bank policy, although concerns remained about the prospect for a global recession in 2023. The UK stock market outperformed other developed markets due to the high weighting in Energy and Banks, while Europe's bourses generally suffered. Among sectors, Energy was notably strong, while Technology and Consumer Discretionary lost ground.

Performance & Activity

Given the main drivers of the market's return were fossil fuel, mining and healthcare stocks – i.e. those not generally held in the Fund – the EdenTree Green Future Fund performed well in the first 11 months since its inception on 24 January 2022.

From a regional perspective, the Fund's underweight in the US proved beneficial, with the US dollar and technology heavy stock market retreating in the second half of the year. The Fund's exposure to the UK and continental Europe was more challenging, in part due to idiosyncratic stock factors. At the sector level, having no exposure to the defensive healthcare sector and not holding Oil & Gas, which was the best performing sector, was a headwind to relative performance. In contrast, the Fund's overweight allocation to Industrials and underweight exposure to Technology was positive for returns.

The Fund benefited from its allocation to Regenerative Agriculture, with holdings such as Valmont Industries performing strongly with the company demonstrating resilient levels of growth in challenging operating conditions. Absolute and relative returns were also boosted by the Fund's allocation to Alternative Energy, with holdings such as SolarEdge Technologies, Alfen Beheer and Prysmian continuing to outperform corporate and consensus expectations. Circular economy holdings Brambles and Clean Harbours also made headway during the period.

Conversely, in the Circular Economy solutions theme, the Fund was negatively impacted by the performance of holdings such as Borregaard and Befesa, as continued inflationary pressures and concerns surrounding a potential economic slowdown continued to weigh on segment. Elsewhere, National Express lost ground amid concerns about wage inflation and higher interest rates on its earnings outlook, which we believe are overdone. Koninklijke DSM, Aptiv and Volution also lost ground.

In terms of investment activity, we constructed the portfolio in line with seven core themes: Alternative Energy, Energy Efficiency, Circular Economy, Environmental Services, Water Management, Future Mobility and Regenerative Agriculture. We have finetuned the Fund's positioning over the year in response to the risks and opportunities posed by the market conditions. In recent months, within Regenerative Agriculture we trimmed the Fund's allocation to Valmont Industries following a sustained period of strong share price performance. Additionally, within Alternative Energy, we added to an existing position in Hannon Armstrong Sustainable Infrastructure Capital, a leader in debt and equity financing to the energy efficiency and renewable energy markets in the United States. The Fund also established a new position in Ansys, a global leader in engineering software, which is used by companies across many industries (including electric vehicle producers, medical device manufacturers and renewable energy infrastructure companies) to design and develop more productive, economical and safer sustainable solutions. Overall, we are using this period of increased volatility to scour the market for competitively advantaged businesses to add to our portfolio that may offer superior risk adjusted return potential.

Outlook

The current uncertainty surrounding the global macroeconomic outlook creates the potential for further volatility in equity markets in the months ahead. The uncertainty largely relates to the outlook for economic growth and the increasing possibility that broad-based inflationary pressures, if sustained, could lead to greater-than-anticipated demand destruction, and a broad softening in the global economic backdrop. Additionally, persistent inflation and materially higher bond yields could lead to further multiple compression within risk assets. While this has unwound to some degree in recent months, we do still see vulnerability to a further normalisation in interest rates for those companies where profitability remains a distant potential and where valuation is not underpinned by cash flow expectations. There is also the possibility of policy error (tightening into a slowing economy) or stagflation (perhaps forcing the hand of central banks).

While we are tactically cautious over the near-term, reflective in a larger-than-usual cash balance on the Fund, we remain constructive on the long-term outlook for environmental solutions globally. We believe that we remain at the nascent stages of a climate-focused industrial revolution, as governments, corporates and consumers increasingly seek renewable sources of energy generation, circularity, as well as cleaner, safer and more reliable sources of key resources such as food and water. The recently initiated Inflation Reduction Act (IRA) in the US and the REPowerEU initiative represent major milestones for this pervasive, multi-decade investment opportunity. Moreover, while company outlooks have become more muted against the challenging backdrop, market valuations in some cases have become overly pessimistic, creating compelling opportunities for our long-term investment approach.

Comparative Tables

The Comparative Tables give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables are calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades. Research costs are no longer part of the broker charges.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by a fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

Class B^

[^]There are no comparative figures as the sub-fund launched on 24 January 2022.

**These prices may have been calculated on a different basis to opening/closing net asset value per share shown in the comparative table, this may result in the opening/closing net asset value per share being higher or lower than the published highest or lowest prices for the period.

Risk Reward Profile

Lower risk

Higher risk

Typically lower rewards

Typically higher rewards

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.

For example a share class whose price has experienced very significant rises and falls will be in a higher risk category, whereas, a share class whose price has experienced less significant rises and falls will be in a lower risk category.

As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.

Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk free investment.

The Share Class is in risk category 6 as its price has experienced very significant rises and falls historically.

Authorised Status

The Company is an Open-Ended Investment Company. It is an umbrella scheme with nine sub-funds. Each sub-fund has investment powers equivalent to that of a UCITS scheme.

No sub-fund held shares in any other sub-fund of the umbrella company at the end of the year.

Assessment of Value

For each of its sub-funds, EdenTree Investment Management Limited (EIM) will publish an Assessment of Value covering the financial year ended 31 December 2022. These statements will be available on EdenTree Investment Management Limited's website no later than 30 April 2023.

Certification of Accounts

Each sub-fund represents a segregated portfolio of assets and accordingly, the assets of a sub-fund belong exclusively to that sub-fund and shall not be used or made available to discharge (directly or indirectly) the liabilities of, or claims against, any other person or body, including any other sub-funds, and shall not be available for such purpose.

Please note that shareholders are not liable for the debts of EdenTree Investment Funds – Series 1.

Remuneration Disclosure (unaudited)

The UCITS V Directive, which came into force on 18 March 2016, requires UCITS Managers to disclose with effect from 1 January 2017 the aggregate remuneration paid by the UCITS Manager and by the UCITS Fund to Identified Staff, together with the number of beneficiaries. The aggregate amount of remuneration must be broken down by category of employees or other staff members and be split into fixed and variable remuneration. Performance fees are not charged in any of the funds.

In accordance with BIPRU and the UCITS V Remuneration Code, EIM has established and applies a remuneration policy which is consistent with and promotes sound and efficient risk management.

The remuneration includes a fixed (salary, pension and benefits according to responsibility and experience) and a variable component (annual bonus and for senior executives long term incentives).

As part of the Benefact Group (previously Ecclesiastical Insurance Group), the remuneration policy of EIM is managed and reviewed by the Group's Remuneration Committee, which consists of four non-executive directors. Reward structures will achieve a balance between short term and long term incentive pay.

Annual bonuses are paid in cash and linked to key strategic goals; the Group's profitability; investment performance (for fund managers); customer & conduct and individual performance targets. For senior managers, material risk takers and control functions the variable component may be deferred and vest over a three year period. It may also be subject to clawback.

Up to date details of the remuneration policy including how remuneration and benefits are calculated and the identities of the persons responsible for awarding remuneration, including composition of the Remuneration Committee are available on our internet site: www.edentreeim.com. A paper copy will be made available free of charge upon request.

The remuneration disclosures below are in respect of the provision of services to UCITS funds rather than total remuneration in the year. Remuneration is apportioned on the basis of assets under management.

Aggregate remuneration by business area	£'000
Total annual remuneration paid by EdenTree to all employees ¹	£11,650
Of which fixed:	£6,671
Of which variable:	£4,979
Number of Management Company employees:	65

¹Includes remuneration payable to EdenTree NEDs

Aggregate remuneration by business area	£'000
Total Remuneration paid to UCITS MRTs ¹	£7,170
Of which paid to Senior Management:	£2,821
Of which paid to other MRTs:	£4,349
Number of MRTs:	19

¹Includes remuneration payable to EdenTree NEDs

SJ Round, Director

JS Brown, Director

 Authorised Corporate Director of EdenTree Investment Funds – Series 1.
 26 April 2023

Statement of the Authorised Corporate Director's Responsibilities

The Authorised Corporate Director ("ACD") of EdenTree Investment Funds – Series 1 (the "Company") is responsible for preparing the Annual Report and the financial statements in accordance with the Open-Ended Investment Companies Regulations 2001 ("the OEIC Regulations"), the Financial Conduct Authority's Collective Investment Schemes Sourcebook ("COLL"), the FCA's Investment Fund Sourcebook ("FUND") and the Company's Instrument of Incorporation.

The OEIC Regulations and COLL require the ACD to prepare financial statements for each annual accounting year which:

- are in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards and applicable law) including FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and the Statement of Recommended Practice: "Financial Statements of UK Authorised Funds" ("SORP") issued by the Investment Association in May 2014 and amended in June 2017; and
- give a true and fair view of the financial position of the Company and each of its sub-funds as at the end of that period and the net revenue and the net capital gains or losses on the property of the Company and each of its sub-funds for that period.

In preparing the financial statements, the ACD is required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the applicable IA SORP has been followed;
- state whether applicable UK Accounting Standards have been followed subject to any material departures disclosed and explained in the financial statements; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in operation.

The ACD is responsible for keeping proper accounting records that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that the financial statements comply with the applicable IA SORP and UK GAAP. The ACD is also responsible for the system of internal controls, and for taking reasonable steps for the prevention and detection of fraud and other irregularities.

In accordance with COLL 4.5.8BR, the Annual Report and the audited financial statements were approved by the board of directors of the Authorised Corporate Director of the Company and authorised for issue on 26 April 2023.

SJ Round, Director

JS Brown, Director

Authorised Corporate Director of EdenTree Investment Funds – Series 1.
Gloucester, United Kingdom
26 April 2023

Statement of the Depositary's Responsibilities

The Depositary must ensure that the Company is managed in accordance with the Financial Conduct Authority's Collective Investment Schemes Sourcebook, the Open-Ended Investment Companies Regulations 2001 (SI 2001/1228), as amended, the Financial Services and Markets Act 2000, as amended, (together "the Regulations"), the Company's Instrument of Incorporation and Prospectus (together the "Scheme documents") as detailed below.

The Depositary must in the context of its role act honestly, fairly, professionally, independently and in the interests of the Company and its investors.

The Depositary is responsible for the safekeeping of all custodial assets and maintaining a record of all other assets of the Company in accordance with the Regulations.

The Depositary must ensure that:

- the Company's cash flows are properly monitored and that cash of the Company is booked into the cash accounts in accordance with the Regulations;
- the sale, issue, repurchase and cancellation of shares are carried out in accordance with the Regulations;
- the value of shares of the Company are calculated in accordance with the Regulations;
- any consideration relating to transactions in the Company's assets is remitted to the Company within the usual time limits;
- the Company's income is applied in accordance with the Regulations; and
- the instructions of the Authorised Fund Manager ("the AFM"), which is the UCITS Management Company, are carried out (unless they conflict with the Regulations).

The Depositary also has a duty to take reasonable care to ensure that the Company is managed in accordance with the Regulations and Scheme documents in relation to the investment and borrowing powers applicable to the Company.

Report of the Depositary to the Shareholders of the Company

Having carried out such procedures as we consider necessary to discharge our responsibilities as depositary of the Company, it is our opinion, based on the information available to us and the explanations provided, that in all material respects the Company, acting through the AFM:

- i) has carried out the issue, sale, redemption and cancellation, and calculation of the price of the Company's shares and the application of the Company's income in accordance with the Regulations and the Scheme documents of the Company; and
- ii) has observed the investment and borrowing powers and restrictions applicable to the Company.

Independent Auditors' Report to the Shareholders of EdenTree Investment Funds – Series 1

Report on the audit of the financial statements

Opinion

In our opinion, the financial statements of EdenTree Investment Funds – Series 1 (the “Company”):

- give a true and fair view of the financial position of the Company and each of the sub-funds as at 31 December 2022 and of the net revenue and the net capital losses on the scheme property of the Company and each of the sub-funds for the respective periods then ended (“respective periods”) is defined as 01 January 2022 to 31 December 2022 for all sub-funds except EdenTree Global Impact Bond Fund and EdenTree Green Future Fund with a period of 24 January 2022 to 31 December 2022; and
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice (United Kingdom Accounting Standards, comprising FRS 102 “The Financial Reporting Standard applicable in the UK and Republic of Ireland”, and applicable law), the Statement of Recommended Practice for UK Authorised Funds, the Collective Investment Schemes sourcebook and the Instrument of Incorporation.

EdenTree Investment Funds – Series 1 is an Open Ended Investment Company (‘OEIC’) with nine sub-funds. The financial statements of the Company comprise the financial statements of each of the sub-funds. We have audited the financial statements, included within the Annual Report and Audited Financial Statements (the “Annual Report”), which comprise: the Balance Sheet as at 31 December 2022; the Statement of Total Return, and the Statement of Change in Net Assets Attributable to Shareholders for the year then ended; the Distribution Tables; and the Notes to the Financial Statements, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (“ISAs (UK)”) and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditors’ responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, which includes the FRC’s Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Conclusions relating to going concern

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company’s or any sub-funds’ ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the Authorised Corporate Director’s use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company’s or any sub-funds’ ability to continue as a going concern.

Our responsibilities and the responsibilities of the Authorised Corporate Director with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors’ report thereon. The Authorised Corporate Director is responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on our work undertaken in the course of the audit, the Collective Investment Schemes sourcebook requires us also to report certain opinions as described below.

Authorised Corporate Director’s Report

In our opinion, the information given in the Authorised Corporate Director’s Report for the financial year for which the financial statements are prepared is consistent with the financial statements.

Responsibilities for the financial statements and the audit

Responsibilities of the Authorised Corporate Director for the financial statements

As explained more fully in the Statement of the Authorised Corporate Director’s Responsibilities, the Authorised Corporate Director is responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view. The Authorised Corporate Director is also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Authorised Corporate Director is responsible for assessing the Company’s and each of the sub-funds ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the Authorised Corporate Director either intends to wind up or terminate the Company or individual sub-fund, or has no realistic alternative but to do so.

Independent Auditors' Report to the Shareholders of EdenTree Investment Funds – Series 1

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the Company/industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of the Collective Investment Schemes sourcebook, and we considered the extent to which non-compliance might have a material effect on the financial statements, in particular those parts of the sourcebook which may directly impact on the determination of amounts and disclosures in the financial statements. We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to posting inappropriate journal entries to increase revenue or to increase the net asset value of the Company or the sub-funds. Audit procedures performed included:

- Discussions with the Authorised Corporate Director, including consideration of known or suspected instances of non-compliance with laws and regulation and fraud;
- Reviewing relevant meeting minutes, including those of the Authorised Corporate Director's board of directors;
- Identifying and testing journal entries, specifically any journals posted as part of the financial year end close process; and
- Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at: www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with paragraph 4.5.12 of the Collective Investment Schemes sourcebook as required by paragraph 67(2) of the Open-Ended Investment Companies Regulations 2001 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Opinion on matter required by the Collective Investment Schemes sourcebook

In our opinion, we have obtained all the information and explanations we consider necessary for the purposes of the audit.

Collective Investment Schemes sourcebook exception reporting

Under the Collective Investment Schemes sourcebook we are also required to report to you if, in our opinion:

- proper accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records.

We have no exceptions to report arising from this responsibility.

Notes to the Financial Statements

For the year ended 31 December 2022

1. Accounting Policies

a. Basis of accounting

The Financial Statements have been prepared in compliance with UK Financial Reporting Standard 102 (FRS 102) and in accordance with the Statement of Recommended Practice: "Financial Statements of UK Authorised Funds" issued by the Investment Management Association (now the Investment Association) in May 2014 (2014 SORP) and amended in June 2017.

2. Summary of Significant Accounting Policies

a. Basis of preparation

The Financial Statements have been prepared under the historical cost basis, as modified by the revaluation of investments and in accordance with the Statement of Recommended Practice: "Financial Statements of UK Authorised Funds" issued by the Investment Management Association (now the Investment Association) in May 2014 (2014 SORP) and amended in June 2017.

The ACD is confident that the Company will continue in operation for at least 12 months from the date of signing the audited financial statements. The Company has adequate financial resources and its assets consist of securities which are readily realisable. As such, the financial statements have been prepared on the going concern basis.

b. Recognition, classification and derecognition of investments

Financial assets and financial liabilities are recognised in the Fund's balance sheet when the Fund becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially recognised at transaction price (including transaction costs) and subsequently measured at amortised cost, except for the Fund's investments classified as financial assets at fair value through profit or loss, which are initially recognised at fair value (excluding transaction costs).

c. Valuation of investments

All investments are valued at their fair value at close of business on 30 December 2022, being the last business day of the financial year. The fair value of non-derivative securities is bid price, excluding any accrued interest. Unquoted investments are shown at the ACD's valuation.

d. Foreign exchange

The base and functional currency of the Funds, being the currency of the primary economic environment in which the Company operates, is Pound Sterling. The values of assets and liabilities denominated in foreign currencies have been converted into Sterling at the exchange rate prevailing at close of business on 30 December 2022. Any exchange differences arising on translation of investments and capital assets and liabilities other than investments are included in "Net capital gains/(losses)" account in the statement of total return. Any exchange

differences arising on translation of other assets or liabilities are included in net revenue.

e. Revenue

Revenue is recognised when the flow of economic benefits is probable and the amount can be measured reliably.

UK dividend revenue is disclosed net of any related tax credit. Overseas dividends are disclosed gross of any foreign tax suffered. Bank and other interest receivable is included on an accrual basis. Accrued interest purchased and sold on interest-bearing securities is excluded from the capital costs of these securities and dealt with as part of the revenue of the Company. Revenue from interest-bearing securities is accounted for on an effective yield basis, irrespective of the level of discount or premium, and is calculated with reference to the purchase price of the securities. Revenue is allocated to the share classes of each sub-fund based on the proportion of assets held by each share class.

Distributions from collective investment schemes are recognised when the schemes are quoted ex-distribution.

Underwriting commission is taken to revenue and is recognised when the issues take place, except where the sub-fund is required to take up all or some of the shares underwritten, in which case an appropriate proportion of the commission is deducted from the costs of these shares.

f. Treatment of stock and special dividends

The ordinary element of stocks received in lieu of cash dividends, which form part of the distribution, is recognised as revenue of the sub-fund based on the market value of the investments on the day they are quoted ex-dividend. Any enhancement above the cash dividend is treated as a capital gain on the investment. Special dividends are recorded as revenue or capital depending on the underlying substance of the transaction.

g. Treatment of interest from debt securities

Interest from debt securities which forms part of the distribution, is recognised as revenue using an effective yield basis, irrespective of the level of discount or premium.

h. Expenses

All expenses, except those relating to the purchase and sale of investments, are included in expenses in the Statement of Total Return. Expenses are recognised on an accruals basis and include irrecoverable VAT where appropriate.

i. Treatment of management expenses

The ACD's annual management fee is charged within the net revenue of the sub-funds. In respect of the EdenTree Responsible and Sustainable Sterling Bond Fund and the EdenTree Responsible and Sustainable Managed Income Fund, the annual management charge is taken from

capital, not revenue, so the capital value of the Company could be reduced over time.

j. Taxation

The sub-funds are liable to Corporation Tax applied at a rate of 20.0%, being the tax rate enacted or substantively enacted at the year end date, on taxable revenue after the deduction of allowable expenses. Deferred tax is provided for by the liability method on all short-term timing differences. UK dividend revenue is disclosed net of any related tax credit. Overseas dividends continue to be disclosed gross of any foreign tax suffered, the tax element being shown separately in the taxation note.

Where overseas tax has been deducted from overseas revenue that tax can, in some instances, be set off against the corporation tax payable, by way of double tax relief.

k. Deferred taxation

The charge for deferred tax is based on the net revenue for the year and takes into account taxation deferred because of timing differences between the treatment of certain items for taxation and accounting purposes. Deferred tax is provided using the liability method on all timing differences, calculated at the rate at which it is anticipated the timing differences will reverse based on tax rates and laws that have been enacted or substantively enacted. Deferred tax assets are recognised only when, on the basis of available evidence, it is more likely than not that there will be taxable profits in the future against which the deferred tax asset can be offset. Deferred tax liabilities are not discounted.

l. Valuation technique

Level 1 inputs are quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date. A quoted market price in an active market provides the most reliable evidence of fair value and is used without adjustment to measure fair value whenever available, with limited exceptions. If an entity holds a position in a single asset or liability and the asset or liability is traded in an active market, the fair value of the asset or liability is measured within Level 1 as the product of the quoted price for the individual asset or liability and the quantity held by the entity, even if the market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price.

Level 2 inputs are inputs other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. Level 2 inputs include: quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, for example interest rates and yield curves observable at commonly quoted intervals, implied volatilities, credit spreads, inputs that are derived principally from or corroborated by observable market data by correlation or other means ('market-

Notes to the Financial Statements

For the year ended 31 December 2022

2. Summary of Significant Accounting Policies (continued)

1. Valuation technique (continued)

corroborated inputs').

The Company may have corporate bonds which fall in to this category as despite quoted prices being available, trading can be irregular and there are often significant lengths of time between traded arm's length transactions.

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs are used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. An entity develops unobservable inputs using the best information available in the circumstances, which might include the entity's own data, taking into account all information about market participant assumptions that is reasonably available. Pricing source for Co-Operative Bank Holdings is a single broker quote.

3. Distribution Policies

a. Revenue distribution to corporate shareholders

A shareholder liable to UK Corporation Tax receives the dividend distribution and associated tax credit as franked investment income to the extent that the gross revenue from which the distribution is made is franked investment income.

The shares of classes 'A', 'B' and 'D' are income shares, while the shares of class 'C' are accumulation shares.

The holders of accumulation shares must add the revenue accumulated (excluding equalisation) to the cost of such shares for capital gains tax purposes.

b. Equalisation

Equalisation applies only to units purchased during the distribution period (Group 2 units). It is the average amount of revenue included in the purchase price of all Group 2 units and is refunded to the holders of these units as a return of capital. Being capital it is not liable to Income Tax but must be deducted from the cost of units for Capital Gains Tax purposes.

c. Unclaimed distribution

Distributions which have remained unclaimed by shareholders for more than six years are credited to the capital property of the Company.

d. Fund's distribution

Each sub-fund's distribution is determined based on the individual authorised fund's net revenue after taxation.

All expenses are charged against revenue, except for EdenTree Responsible and Sustainable Managed Income Fund and EdenTree Responsible and Sustainable Sterling Bond Fund where annual management expense is charged to capital, and other than those relating to the purchase and sale of investments on each sub-fund. Expenses relating to each sub-fund are allocated to the share classes based on the proportion of assets held within each share class.

4. Risk Management Policies

The main risks arising from the Company's financial instruments are market price, foreign currency, interest rate, liquidity and credit. The ACD reviews policies for managing each of these risks. These policies have remained unchanged since the beginning of the year to which these financial statements relate.

The ACD regularly considers the asset allocation of the portfolio in order to minimise the risk associated with particular countries or industry sectors whilst continuing to follow the investment objective. Individual fund managers have responsibility for monitoring the existing portfolio selected in accordance with the overall asset allocation parameters described above and seeks to ensure that individual stocks also meet the risk reward profile that is acceptable.

The ACD does not use derivative instruments to hedge the investment portfolio against market risk, because in its opinion the cost of such a process would result in an unacceptable reduction in the potential for capital growth. No derivatives were held during the year under review.

- **Market risk:** arises mainly from uncertainty about future prices of financial instruments held. It represents the potential loss the Company might suffer through holding market positions in the face of price movements.

If market prices had increased by 10% as at the balance sheet date, the net asset values of the sub-funds would have increased by the following amounts. If market prices had decreased by 10% as at the balance sheet date, the net asset value of the sub-funds would have decreased by the following amounts.

	10% Increase/ (Decrease)	% of NAV
EdenTree Responsible and Sustainable UK Equity Fund	£17,148,262	9.96%
EdenTree Responsible and Sustainable European Equity Fund	£12,065,771	9.93%
EdenTree Responsible and Sustainable Global Equity Fund	£22,328,567	9.22%
EdenTree Responsible and Sustainable Short Dated Bond Fund	£42,882,465	9.82%
EdenTree Responsible and Sustainable Sterling Bond Fund	£28,252,283	9.79%
EdenTree Responsible and Sustainable Managed Income Fund	£34,701,257	9.71%
EdenTree Responsible and Sustainable UK Equity Opportunities Fund	£10,907,220	9.54%
EdenTree Global Impact Bond Fund	£2,171,013	9.74%
EdenTree Green Future Fund	£2,333,890	8.78%

- **Currency risk:** the revenue and capital value of the Company's investments can be affected by foreign currency translation movements as some of the Company's assets and income are denominated in currencies other than sterling which is the Company's functional currency. Currency risk exposure is a fundamental part of the investment management process, and is monitored by the ACD's fund management team on an ongoing basis.

The ACD has identified three principal areas where foreign currency risk could impact on the Company. These are movement in exchange rates affecting the value of investments, short-term timing differences such as exposure to exchange rate movement during the year between commencement of the investment transaction and the date when settlement of the investment occurs, and finally movements in exchange rates affecting income received by the Company. The Company converts all receipts of revenue, received in currency, into Sterling on the day of receipt.

Notes to the Financial Statements

For the year ended 31 December 2022

4. Risk Management Policies (continued)

At the year end date, a portion of the net monetary assets of the Company was denominated in currencies other than Sterling with the effect that the balance sheet and total return can be affected by exchange rate movement.

If GBP to foreign currency exchange rates had strengthened/increased by 3% as at the balance sheet date, the net asset values of the sub-funds would have decreased by the following amounts. If GBP to foreign currency exchange rates had weakened/decreased by 3% as at the balance sheet date, the net asset values of the sub-funds would have increased by the following amounts. These calculations assume all other variables remain constant.

	3% Increase/ (Decrease)	% of NAV
EdenTree Responsible and Sustainable UK Equity Fund	£349	0.00%
EdenTree Responsible and Sustainable European Equity Fund	£3,646,212	3.00%
EdenTree Responsible and Sustainable Global Equity Fund	£6,573,405	2.72%
EdenTree Responsible and Sustainable Short Dated Bond Fund	£Nil	Nil
EdenTree Responsible and Sustainable Sterling Bond Fund	£79	0.00%
EdenTree Responsible and Sustainable Managed Income Fund	£3,778,591	1.06%
EdenTree Responsible and Sustainable UK Equity Opportunities Fund	£1,095	0.00%
EdenTree Global Impact Bond Fund	£15,728	0.07%
EdenTree Green Future Fund	£630,604	2.37%

- Interest rate risk:** the Company invests in both fixed rate and floating rate securities. Any change to the interest rates relevant for particular securities may result in either revenue increasing or decreasing, or the ACD being unable to secure similar returns on the expiry of contracts or the sale of securities. In addition, changes to prevailing rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. Interest rate risk exposure is a fundamental part of the investment management process, and is monitored by the ACD's fund management team on an ongoing basis.

If interest rates had increased by 0.5% as at the balance sheet date against all investments in bonds, the net asset values of the sub-funds would have decreased by the following amounts. If interest rates had decreased by 0.5% as at the balance sheet date against all investments in bonds, the net asset values of the sub-funds would have increased by the following amounts. These calculations assume all other variables remain constant.

	0.5% Increase/ (Decrease)	% of NAV
EdenTree Responsible and Sustainable UK Equity Fund	£Nil	Nil
EdenTree Responsible and Sustainable European Equity Fund	£Nil	Nil
EdenTree Responsible and Sustainable Global Equity Fund	£Nil	Nil
EdenTree Responsible and Sustainable Short Dated Bond Fund	£2,144,123	0.49%
EdenTree Responsible and Sustainable Sterling Bond Fund	£1,364,467	0.47%
EdenTree Responsible and Sustainable Managed Income Fund	£131,251	0.04%
EdenTree Responsible and Sustainable UK Equity Opportunities Fund	£Nil	Nil
EdenTree Global Impact Bond Fund	£105,763	0.47%
EdenTree Responsible and Sustainable UK Equity Opportunities Fund	£Nil	Nil

- Liquidity Risk:** The Funds may be affected by a decrease in market liquidity for the securities in which they invest, which may mean that the Funds may not be able to sell some securities at a fair price in a timely manner. In order to mitigate this risk, a substantial proportion of the Funds' assets consist of readily realisable listed securities. EdenTree, as the ACD, monitors liquidity risk for each portfolio in line with the liquidity policy. This includes holding a proportion of assets that can be liquidated quickly and with a limited impact on price, also depending on its actual or hypothetical redemption profile, investment strategy, regulatory framework or contractual obligations. Cash-flow is monitored at the Fund level on a daily basis.

- Credit risk:** certain transactions in securities that the Company enters into expose it to the risk that the counterparty will not deliver the investment (purchase) or cash (sale) after the Company has fulfilled its responsibilities.

- Credit rating risk:** The current fixed interest portfolio consists of a range of fixed interest instruments including government securities, preference shares, permanent interest bearing shares, overseas bonds and corporate loans and bonds. Limits are imposed on the credit ratings of the corporate bond portfolio and exposures regularly monitored.

The Company only buys and sells investments through brokers which have been approved by the ACD as an acceptable counterparty. In addition, limits are set as to the maximum exposure to any individual broker that may exist at any time. These limits are reviewed regularly.

Notes to the Financial Statements

For the year ended 31 December 2022

6. Purchases, sales and transaction costs (continued)

Average portfolio dealing spread

The portfolio transaction costs tables above include direct transaction costs suffered by the sub-funds during the year.

Separately identifiable direct transaction costs (commissions and taxes etc.) are attributable to the sub-fund's purchase and sale of equity shares. Additionally for equity shares there is a dealing spread cost (the difference between the buying and selling prices) which will be suffered on purchase and sale transactions.

The sub-funds' average portfolio dealing spread expressed as a percentage of the value determined by reference to the buying price are as follows: EdenTree Responsible and Sustainable UK Equity Fund 0.59% (2021: 0.55%); EdenTree Responsible and Sustainable European Equity Fund 0.14% (2021: 0.20%); EdenTree Responsible and Sustainable Global Equity Fund 0.23% (2021: 0.18%); EdenTree Responsible and Sustainable Short Dated Bond Fund 0.28% (2021: 0.25%); EdenTree Responsible and Sustainable Sterling Bond Fund 1.14% (2021: 0.88%); EdenTree Responsible and Sustainable Managed Income Fund 0.86% (2021: 0.59%); EdenTree Responsible and Sustainable UK Equity Opportunities Fund 0.90% (2021: 1.02%); EdenTree Global Impact Bond Fund 0.66% (2021: Nil%); EdenTree Green Future Fund 0.17% (2021: Nil%).

For the sub-fund's investment transactions in debt instruments any applicable transaction charges form part of the dealing spread for these instruments.

Notes to the Financial Statements

For the year ended 31 December 2022

9. Taxation (continued)

c. Deferred tax

There are no deferred tax provisions for the current or prior year.

The EdenTree Responsible and Sustainable UK Equity Fund has not recognised a deferred tax asset of £4,059,758 (2021: £3,732,800) arising as a result of having unutilised management expenses. The EdenTree Responsible and Sustainable European Equity Fund has not recognised a deferred tax asset of £1,546,142 (2021: £1,365,454) arising as a result of having unutilised management expenses. The EdenTree Responsible and Sustainable Global Equity Fund has not recognised a deferred tax asset of £4,964,322 (2021: £4,559,518) arising as a result of having unutilised management expenses. The EdenTree Responsible and Sustainable Short Dated Bond Fund has no deferred tax assets (2021: £Nil). The EdenTree Responsible and Sustainable Sterling Bond Fund has no deferred tax assets (2021: £Nil) arising as a result of having excess non-trade loan deficits. The EdenTree Responsible and Sustainable Managed Income Fund has not recognised a deferred tax asset of £505,971 (2021: £316,296). The EdenTree Responsible and Sustainable UK Equity Opportunities Fund has not recognised a deferred tax asset of £3,780,510 (2021: £3,557,480) arising as a result of having unutilised management expenses. The EdenTree Global Impact Bond Fund has no deferred tax assets (2021: £Nil). The EdenTree Green Future Fund has not recognised a deferred tax asset of £30,432 (2021: £Nil) arising as a result of having unutilised management expenses. These are not expected to be utilised in the foreseeable future unless the nature of the sub-funds' revenue or capital gains/(losses) changes.

Notes to the Financial Statements

For the year ended 31 December 2022

10. Distributions

The distributions take account of revenue received on the creation of shares and revenue deducted on cancellation of shares, and comprise:

Notes to the Financial Statements

For the year ended 31 December 2022

14. Contingent liabilities and outstanding commitments

There were no contingent liabilities at the balance sheet date (2021: £Nil).

15. Related parties

EdenTree Investment Management Limited (EIM), acts as principal on all the transactions of shares in the Company. The aggregate monies received through creations and liquidations are disclosed in the statement of change in net assets attributable to shareholders and amounts due to/from EIM in respect of share transactions at year end are disclosed in notes 11 and 13.

EIM did not enter into any other transactions with the Company during the year under review.

As at 31 December 2022, fellow Group companies of the ultimate parent company, Benefact Trust Limited owned:

EdenTree Responsible and Sustainable UK Equity Fund	3%
EdenTree Responsible and Sustainable European Equity Fund	33%
EdenTree Responsible and Sustainable Global Equity Fund	10%
EdenTree Responsible and Sustainable Short Dated Bond Fund	3%
EdenTree Responsible and Sustainable Sterling Bond Fund	1%
EdenTree Responsible and Sustainable Managed Income Fund	–
EdenTree Responsible and Sustainable UK Equity Opportunities Fund	55%
EdenTree Global Impact Bond Fund	76%
EdenTree Green Future Fund	73%

16. Financial instruments

In pursuing its investment objectives set out on pages 4 to 7, the Company may hold a number of financial instruments, these comprise:

- equity and non-equity shares, fixed income securities and floating rate securities. These are held in accordance with the Company's investment objectives and policies;
- cash, liquid resources and short-term debtors and creditors that arise directly from its operations;
- shareholders' funds which represent investors' monies which are invested on their behalf; and
- short term borrowings used to finance investment activity.

Notes to the Financial Statements

For the year ended 31 December 2022

17. Risks of financial instruments

Currency exposures:

A proportion of the net assets of the Company are denominated in currencies other than Sterling, with the effect that the balance sheet and the total return can be affected by currency movements.

The split of the interest rate risk profile by currency is not shown above, as in the ACD's opinion, this does not enhance the user's understanding of the financial statements. The floating rate financial assets and liabilities comprise currency bank balances and overdrafts that bear interest. The Sterling floating interest rates are determined after SONIA, other currencies are determined by the relevant authority. None of the liabilities of the sub-funds carry any interest.

Notes to the Financial Statements

For the year ended 31 December 2022

18. Fair Value

The fair value of a financial instrument is the amount for which it could be exchanged between knowledgeable, willing parties in an arm's length transaction. There is no significant difference between the value of the financial assets, as shown in the financial statements, and their fair value.

*Pricing source for Co-Operative Bank Holdings is a single broker quote.

The valuation technique has been disclosed under note 2 Summary of Significant Accounting Policies on pages 84 and 85.

When individual stocks are suspended or delisted, the ACD will, in the first instance, price the stock at the suspension or last traded price. This will be reviewed on a regular basis by the ACD who will decide whether or not to write down the price further based on information available from the company itself, its brokers, auditors or any other reliable market source.
