

# EdenTree Global Sustainable Government Bond Fund

## Share Class I

GB00BQ3S5Z21

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest. This fund is a sub-fund of EdenTree Investment Funds – Series 1, an open ended investment company managed by EdenTree Investment Management Limited as the Authorised Corporate Director.

### Objectives and Investment Policy

#### Financial Objective

The Fund aims to generate a regular income payable quarterly with some capital growth over a period of five years or more through investment in a portfolio of government and government-related green, social, sustainable or impact bonds.

#### Sustainability Objective

To invest in government and government-related green, social, sustainable or impact bonds whose proceeds will be used to finance new or existing projects that support a reduction in the level of carbon emissions caused by human activities (measured in tonnes of carbon dioxide equivalent CO2 avoided), and/or to enable greater access to basic social services (measured in number of beneficiaries).

The Fund will invest at least 80% of its assets in government and government-related bonds from developed markets with use-of-proceeds provisions. These assets will include sovereigns, supra-nationals, sub-sovereigns, and agencies, and will be selected in accordance with the Sustainability Approach. They can be denominated in any currency.

Up to 20% of the Fund may be invested in other assets that do not meet the Sustainability Approach but will not conflict with the Fund's sustainability objective. These may include units in collective investment schemes, floating rate notes (FRNs), money-market instruments, derivatives and forward transactions, deposits, bonds, convertible bonds, cash and near cash. All government and government-related bonds, as well as any other assets held, will be required to meet the Manager's oppressive regimes assessment.

The Fund may invest in derivatives for the purpose of efficient portfolio management. If derivatives are used for the purpose of meeting the investment objective of the Fund, it is not intended that the use of derivatives would cause the Net Asset Value of the Fund to have higher volatility or otherwise cause the existing risk profile of the Fund to change.

More information on the investment policy and our Sustainability Approach can be found in the full Prospectus which is available at [www.edentreeim.com/literature](http://www.edentreeim.com/literature)

You may buy and sell shares on any day on which the London Stock Exchange is open for business.

The Fund may not be appropriate if you plan to withdraw your money within 5 years.

### Risk and Reward Profile

Lower risk = Typically lower rewards

Higher risk = Typically higher rewards

- The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price.
- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category, whereas a Share Class whose price has experienced less-significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using simulated historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 3 as its price has experienced moderate rises and falls historically based on simulated data. The Fund was launched in October 2024 and therefore the risk category is based on simulated data to July 2024 with actual fund data thereafter.

#### What risks are associated with this fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- Selecting bonds due to our ethical criteria means that the choice of stocks is limited to a subset of the stockmarket and this could lead to variance in the Fund's performance against its benchmark.
- Changes in interest rates will affect the value and the interest earned from the bonds held by the Fund. When interest rates rise, the capital value of the Fund is likely to fall and vice versa.
- The issuer of a financial security held within the Fund may not pay income or repay capital to the Fund when due. The value of a security may be affected by the general state of the economy and market perception of the risk of default.
- The base currency of the Fund is GBP, but it will hold securities denominated in other currencies. The Fund will use currency hedging in order to minimise currency risk.

More details on all of the risks mentioned above can be found in the full Prospectus.

# Key Investor Information

## Charges for this Fund

The charges you pay are used to cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge	0%
Exit charge	None

This is the maximum that might be taken out of your money (before it is invested) (before the proceeds of your investment are paid out).

### Charges taken from the Fund over a year

Ongoing charges	0.30%
-----------------	-------

### Charges taken from the Fund under specific conditions

Performance fee	None
-----------------	------

The entry charge shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser or distributor.

The ongoing charges figure is based on an estimate of expenses for the fund. This figure may vary from year to year and excludes portfolio transaction costs.

The ongoing charges figure is currently capped at 0.30%. The actual ongoing charges figure is estimated to be 0.43%. EdenTree will continue to apply the cap to the ongoing charges as long as the actual ongoing charges are higher than the cap. The ongoing charges charged to the Fund will be the lower of the ongoing charges figure cap and the actual ongoing charges figure.

If you switch Funds within the EdenTree Investment Management range you will be charged a maximum 1% entry charge on your new Fund. The switching charge is currently set to zero.

For more information about charges, please see Appendix 1 of the Fund's Prospectus, which is available at [www.edentreeim.com/literature](http://www.edentreeim.com/literature)
