## Share Class B

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

This fund is a sub-fund of EdenTree Investment Funds – Series 1, an open ended investment company managed by EdenTree Investment Management Limited as the Authorised Corporate Director.

### Objectives and Investment Policy

#### Financial Objective

To achieve long-term capital growth over five years or more with an income through a diversified portfolio of international (including the UK) companies.

#### Sustainability Objective

To invest in companies that make a positive contribution to people (employees, supply chain workers, local communities and customers) and the planet (the environment), through their products, services, and/or operations. In order to demonstrate a positive contribution to people and the planet, companies must meet the EdenTree Standard of Sustainability.

The portfolio will consist of at least 80% listed securities but the Manager may also invest in units in collective investment schemes, money-market instruments, derivatives and forward transactions, deposits, nil and partly-paid securities, bonds, convertible bonds, cash and near cash as deemed economically appropriate to meet the Fund's objective.

At least 80% of the fund's assets will be invested in line with the sustainability approach. Up to 20% of the Fund may be invested in other assets that do not meet the Sustainability Approach but will not conflict with the Fund's sustainability objective.

The Fund may invest in derivatives for the purpose of efficient portfolio management. If derivatives are used for the purpose of meeting the investment objective of the Fund, it is not intended that the use of derivatives would cause the Net Asset Value of the Fund to have higher volatility or otherwise cause the existing risk profile of the Fund to change.

More information on the investment policy and our Sustainability Approach can be found in the full Prospectus which is available at [www.edentreeim.com/literature](http://www.edentreeim.com/literature)

You may buy and sell shares on any day on which the London Stock Exchange is open for business.

The Fund may not be appropriate if you plan to withdraw your money within 5 years.

### Risk and Reward Profile

Lower risk = Typically lower rewards

Higher risk = Typically higher rewards

- The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price have been historically.
- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category, whereas a Share Class whose price has experienced less-significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 5 as its price has experienced significant rises and falls historically.

#### What risks are associated with this Fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- Selecting stocks due to our ethical criteria means that the choice of stocks is limited to a subset of the stockmarket and this could lead to greater volatility.
- When investing in assets which are in currencies other than Sterling, exchange rate fluctuations can have a positive or negative impact on the value of your investment.
- Where Funds invest in some overseas markets, these investments may carry risks associated with failed or delayed settlement of market transactions and with the registration and custody of securities. Investment in emerging markets may involve a higher than average risk.

More details on all of the risks mentioned above can be found in the full Prospectus.
