This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

This fund is a sub-fund of EdenTree Investment Funds – Series 1, an open ended investment company managed by EdenTree Investment Management Limited as the Authorised Corporate Director.

### Objectives and Investment Policy

#### Financial Objective

To invest in fixed income securities globally to deliver a regular level of income, payable quarterly.

#### Sustainability Objective

To generate positive environmental and social impacts with the following goals:

- i) To support a reduction in the level of greenhouse gas (GHG) emissions by investing in bonds that provide sustainable solutions and engaging with the companies that issue them.
- ii) To support an increase in access to basic services for underserved communities by investing in bonds that contribute to the following themes - Social Infrastructure, Health & Wellbeing and Education & Financial Inclusion, and engaging with the companies that issue them.

The Fund aims to invest at least 80% in publicly listed bonds (or other fixed interest securities) which are selected in accordance with the Sustainability Approach. Up to 20% of the Fund may be invested in other assets that do not meet the Sustainability Approach but will not conflict with the Fund's sustainability objective. These include units in collective investment schemes, money-market instruments, derivatives and forward transactions, deposits, nil and partly paid securities, bonds, convertible bonds, cash and near cash as deemed economically appropriate to meet the Fund's investment objective.

We do not currently intend to use derivatives for any purpose other than the efficient management of the Fund.

Further information on the fund's Sustainability Objective and Approach can be found in the Fund's Sustainability Disclosure and in the Prospectus which are available at [www.edentreeim.com/literature](http://www.edentreeim.com/literature). You may buy and sell shares on any day on which the London Stock Exchange is open for business.

Any income on the Fund will be paid out to you or you may choose to have it reinvested by purchasing additional shares.

The Fund may not be appropriate if you plan to withdraw your money within 5 years.

### Risk and Reward Profile

Lower risk = Typically lower rewards

Higher risk = Typically higher rewards

The risk category above is not a measure of capital loss or gains, but of how significant the rises and falls in the Share Class price.

- For example a Share Class whose price has experienced significant rises and falls will be in a higher risk category whereas a Share Class whose price has experienced less significant rises and falls will be in a lower risk category.
- As the Share Class risk category has been calculated using simulated historical data, it may not be a reliable indication of the Share Class future risk profile.
- Please note that the Share Class risk category may change in the future and is not guaranteed. The lowest risk category does not mean a risk-free investment.
- The Share Class is in risk category 4 as its price has experienced moderate rises and falls historically based on simulated data. The Fund was launched in January 2022 and therefore the risk category is based on simulated data to December 2021 with actual fund data thereafter.

#### What risks are associated with this fund?

- The value of your investment and the income you get from it may fall as well as rise and you could get back less than you put in. What you get back when you cash in your investment will depend on investment performance.
- Selecting stocks due to our ethical criteria means that the choice of stocks is limited to a subset of the stockmarket and this could lead to greater volatility.
- Changes in interest rates will affect the value and the interest earned from the bonds held by the Fund. When interest rates rise, the capital value of the Fund is likely to fall and vice versa.
- The issuer of a financial security held within the Fund may not pay income or repay capital to the Fund when due. The value of a security may be affected by the general state of the economy and market perception of the risk of default.
- When investing in assets which are in currencies other than Sterling, exchange rate fluctuations can have a positive or negative impact on the value of your investment.

More details on all of the risks mentioned above can be found in the full Prospectus.
